The Fully-Interactive Adult Game Show

True to it's Award-Winning Tradition
Rom Antics Presents

Join in the quick-witted banter between host and each of six contestants.

Be challenged by games of sex trivia, raunchy hangman, photo-based matching games and explicit slider puzzles.

Win erotic scenes to satisfy any taste.

The Rodney Rubber Show combines fully-animated characters with high-quality adult images and video in a challenging game-show environment.

Unique characters – the nasty dominatrix, with painful lashes of her whip; the labia-flashing blonde, and of course, our outrageous, sleezy host – Rodney Rubber.

A CLASSIC FOR
ANY COLLECTION

Publisher's Message

Who is Obsolete?

IN THIS ISSUE WE GET TO THE HEART OF THE controversy over new technologies and sex with a special section called *Are Women Obsolete?*

Will multimedia keep single guys home on Saturday nights interacting with their computers? Will married men take on virtual mistresses and ignore their flesh-and-blood families? We talk to men, women, and porn stars, wrapping it all up with some surprising survey results.

This Is Our Last Issue

Print issue, that is. Starting with our next issue, *Interactive Quarterly* will be published as a fully interactive CD-Rom.

All of you have CD-Rom drives and an interest in adult material. What better format than an interactive CD-Rom?

Can you imagine a *Car & Driver* review that lets you sit in the cockpit of a Porsche Twin Turbo? Rather than read about going 0-60 m.p.h. in 4.3 seconds, you could actually feel the rapid acceleration as your pulse races.

Well, with *IQ Digizine*, you will be able to sample the disks you read about. Go to "Reviews," and interact with the latest adult CD-Roms on the market. Visit our "Demos" section and sample ten of the latest adult titles.

Each CD-Rom issue will come packed with video footage as well as many high-quality stills. We'll put hours of fascinating, erotic exploration at your fingertips. "Show-and-Tell" interviews with sexy adult stars, full coverage of the hottest Internet sites, and, of course, our popular "Interactive Cafe," with news and tidbits on the stars, producers, new titles and other faces in the world of erotica.

Many of you subscribed to *Interactive Quarterly* to read our honest, hard-hitting reviews. We'll still be there, researching the newest releases, but now you'll be able to experience some of these titles *before* you put down your hard-earned cash.

IQ Digizine will be, without a doubt, the ultimate interactive guide to adult entertainment. I can assure you that you'll never have to buy a CD-Rom based on its hot cover design and catchy title only to find a beat disk inside. Never again will you buy "Virtual Sex Kittens" only to find a home video of "Mittens" or "Paws" frolicking in someone's backyard. Virtually that is.

There are many titles out there masquerading as "interactive" when they're really glorified movies for \$49. We want to help you choose the best titles and avoid the "impostors."

IQ Digizine will be engaging, fun, sexy, and informative. We hope you will agree.

As always, I look forward to your comments and suggestions. Enjoy!

Bonkers in Bosnia

Dear IQ:

I am with the 23rd Medical Company out of Landstuhl, Germany. We are a helicopter company that provides Medevac support for all the IFOR forces deployed to Bosnia, Croatia and Hungary. I am currently deployed in Bosnia. My unit has been here since December 24th. It has been a long five months. My unit has about two hundred and fifty people in it. We are stationed at a Norwegian medical camp. The camp is about one quarter mile square. The only source of entertainment is our computers, those of us that brought them. They help relieve some of the stress and boredom of this place. At last count there were forty-three computers here, everything from laptops to full towers.

This brings me to the reason for this letter. I received some computer magazines in the mail and we saw your ad. We were wondering if you could send us any donations, shareware, demos, etc., that would spark new interest. If you can help us out with any kind of donations, that would be great, if you cannot, we would still really appreciate a catalog from your company. There are very few women on this camp of five hundred people, bringing the morale to an all time low. The only women we see are those in

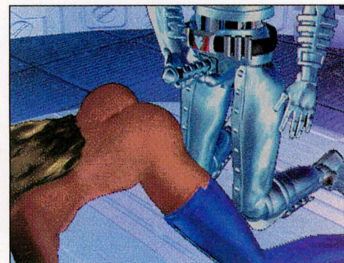

We welcome your comments, critiques and curiosity. Write us at Interactive Quarterly Letters, 551 Valley Road, Montclair, NJ 07043. E-Mail us at IQMag@aol.com, or fax us at 201.783-3686. All letters become the property of Interactive Quarterly. We reserve the right to edit for length and content.

Interactive Cafe

To The (Virtual) Victor Go the Spoils

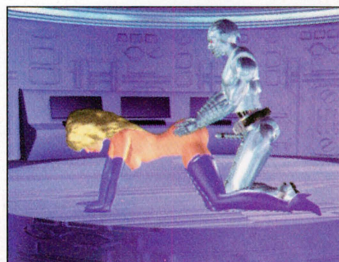

LOCK, LOAD, GET ON YOUR Psion Cycle and enter the bizarre, dark, seedy Pleasure Dome. You must find a DNA disk that holds the secret to your very survival. On the way, you'll encounter the

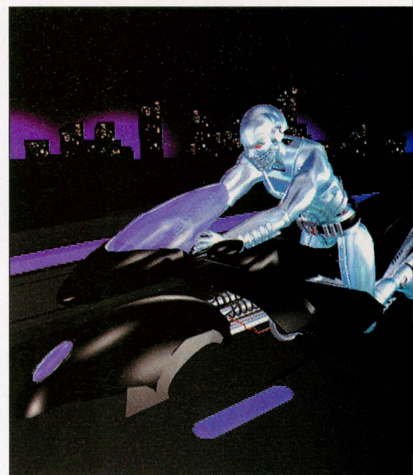

mysterious ladies of the Dome. Seduce them. Dominate them. But never forget your mission.

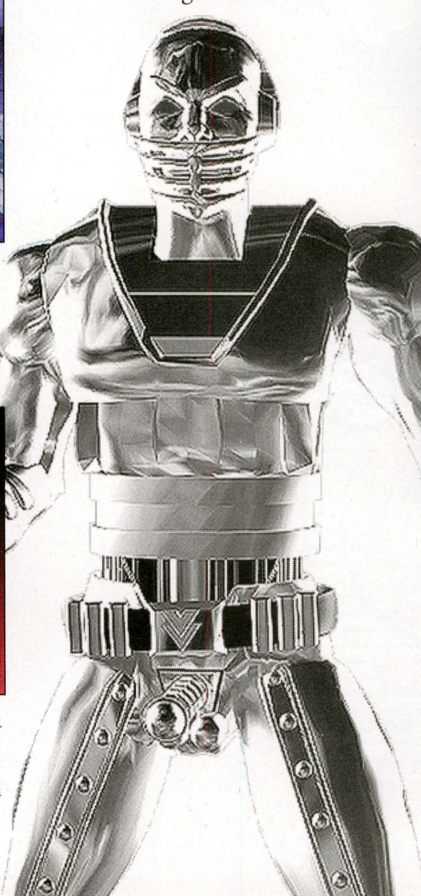

Sound exciting? It's all in a day's work for *Virtual Victor*. This new game presents you with

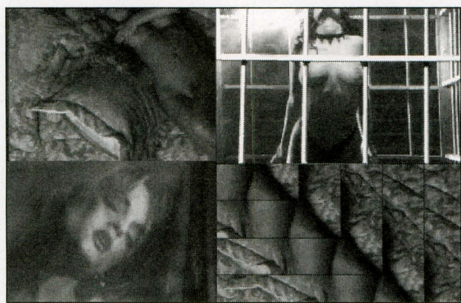

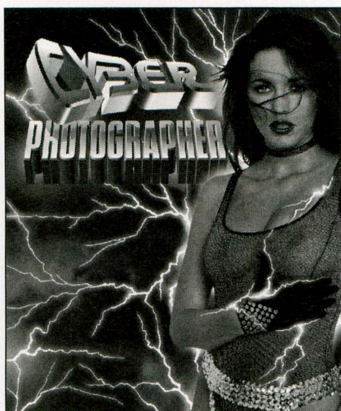

dazzlingly rendered 3D graphics that allows you to view things from nearly any angle. You control all of Victor's movements and even the sound of his voice and the positions he chooses in his encounters with the ladies of the Dome. The game also features a

rocking soundtrack by Fearless Mutant Entertainment. The game, created by Nelson Chu, promises to bring an element of hard core sex to the world of gaming.

Cyber Photographer: 3 Models, 3,600 Images

IMAGINE: THE STEREO WAILS with hot techno or industrial tunes. You unconsciously start to shake your butt as you check your lenses. You adjust the lights on the set you chose. In walks Jacqui St. James, one of three models, wearing the costume you selected for her. You tell her what pose you want and you start clicking away.

And then you wake

up, right? MacDaddy's *Cyber Photographer* promises to turn your computer into the "ultimate photography studio" and you into "the world's greatest sophisticated adult photographer." The two-disc set promises to be a technological triumph, using full Quick Time VR that allows you to work with a 3-D model.

The program also contains a print shop engine that allows you to turn your newly attained photo portfolio into a personalized calendar, card or notepad.

Adult CD Expo Takes On Las Vegas

FAY SHARP OF TRADE SHOW Productions knows how to get folks excited. Running at the same time as ComDex '96, her company will present AdultDex, now officially called "The Adult Entertainment Expo."

The national showcase for adult software will be in Las Vegas November 19-22. Once again, the show will benefit from the presence of ComDex, the world's largest computer expo, which will bring up to 200,000 consumers, buyers, and exhibitors to the desert gambling capital.

Sharp has learned from last year's successful gathering of the adult computer entertainment community. The show's location will pleasantly surprise this year's participants. It happens in the heart of the action this year, at the new Sahara Hotel Annex on the ComDex side of Paradise Avenue, making it easier for participants to visit both shows.

However, the word that really

caught our ear was . . . "free!"

In a welcome change from last year, exhibitors have passes to give away for "Reseller's Day". That's Tuesday, the opening day of the exhibition extravaganza. Also free to the first 2,000 folks who come through the door will be an official Adult Entertainment Expo CD-Rom. This dynamic disk offers a spicy selection of wares from all the exhibitors.

Beyond the giveaways, the focus of the Expo has widened. The 1996 show will include the latest in 3D Virtual Reality Video,

many CD-ROM publishers, and lots of Internet goodies.

If this has whet your appetite, check out the new AdultDex website: www.a1.com. "The Internet has become the darling that CD-Rom was for Adult Entertainment," bubbles the ebullient Sharp.

She also promises that this year, resellers and retailers will be able to sell the products displayed. Now you can go home with the latest and greatest, instead of waiting until you get back home to buy.

Duke Phuk'em, Alien Hunter

IMAGINE LOS ANGELES crawling with sex-crazed aliens. Yeah, right, what else is new?

What's new is the parody of Duke Nukem coming soon from Digital Dogz. In this adult action game, nymphomaniacs from outer space have invaded L.A. You must destroy them before they accomplish their plan to kill every male on the planet through forced sex marathons. What a way to go!

As Duke Phuk'em, you'll have to battle blonde, brunette, and red-headed alien chicks with an arsenal of anatomical weapons to get through the 30-plus levels of the game.

You can find a shareware ver

DUKE PHUK'EM

sion on the Interactive Quarterly website (<http://www.iqmag.com>) and other adult sites.

magazines or on our computers. We are going crazy.

Thank you very much for your time.

Spc. Louis G

Dear Louis,
We support our fighting forces. Expect to see some copies of IQ in your APO box very soon.

Dear IQ

Just a short note to say thank you for the hints on *Virtual Valerie 2*. After months I finally made (?) the game. Keep up the excellent mag. A big fan!!

Dave T.

Dave,
Glad to be of service. Does anyone out there want information, cheats and hints on other games? E-Mail your requests to iqmag@aol.com. Our experts will dig them out for you and we will print them, as space allows.

Dear IQ

I checked out your mag and was very disappointed. This is not what I call adult material, more like PG rating. The articles in an adult mag should get graphic. I want a review for an adult, not an overview for a teenager. My wife reads romance paperbacks and they at least get the imagination going.

Raymond H.

Ray,
We want to be your source for information on Adult CD-Roms. There are plenty of erotic magazines out there, but very few offer the kind of hard core INFORMATION on the subject that we do. But look for some sexy changes with our upcoming 'Digizine' issue.

Dear IQ:

IQ is an answer to modern needs, very useful and interesting.

Unfortunately, using adult CD's is not common in Iran. This is because:

1) Adult materials are illegal, 2) CD Roms are very expensive.

The deplorable economic conditions here cause Iranians to be deprived.

I think that if the use of

\$59⁹⁵

Adult CD Roms became common in Iran, there would be three good results:

- 1) A good market will be made for the producers.
- 2) Iranians will feel less pressure from the Islamic Regime.
- 3) Many CD's will be made with Iranian models and that would help variety in the market.

Please let me know how I can contact the various actresses featured in the Adult CD Roms.

Mehrdad
Shiraz, Iran

*Mehrdad,
A compelling letter, and not our first from an Islamic theocracy. Americans sometimes don't appreciate the joys of religious freedom. Our new feature on the upcoming IQ Digizine, allows you to access the addresses of your favorite Adult CD-Rom actresses.*

Dear Sirs,
I got your latest issue and it's really great. There is nothing like it available in Europe. I love the look of American girls and their sometimes naughty behaviour. It starts with the quality of the paper, goes on with the good photos and the excellent articles and last but not least with the description of the new releases of erotic CD's. Please keep your style — I think it is in the upright position.

Peter A.
Germany

Dear IQ:
As a new but faithful subscriber, just wanted to say I enjoy your mag. The reviews help steer us from the less interactive and less wanted programs. Thanks!

Todd P.

Dear IQ:
I received my second issue today. I am very pleased. I also received the sampler CD-Rom. I have a suggestion for your advertisers:

Paris Sex Fair, Uncovered

ONCE UPON A TIME IN Paris, women could get arrested for just lifting their skirts to do the Can-Can. At the turn of the century, that was the height of public erotic entertainment — especially if you had the point of view of Toulouse Lautrec. At the recently finished Paris Sex Fair, however, men seemed to be the dancers of choice. A Canadian “policeman” and a guide to Paris sex clubs were among the hot tickets at this year's World Erotica Exposition in the French capital.

Like trade shows anywhere, the exhibition took place in an anonymous steel building, this one just north of the city of light. A discerning buyer could find nearly any kind of erotic thrill for sale or rent, from live entertainment, to an enormous selection of videos. At one booth, a well-endowed model dressed in leatherette wore a selection of pet snakes, the actual item for sale. A booth specializing in provocative women's clothing promoted denim and lace as this year's “in” combination. They did a brisk trade in their hottest item, a transparent lace bustier beneath a lace-trimmed blue-jean jacket. Yet another booth offered mint-flavored lubricating gel in an unbreakable clear-plastic container, touted as “the first one on the market that is totally safe to consume.” Even the bar got into the act with a specially blended champagne concoction they called “Brut d'Erotica.”

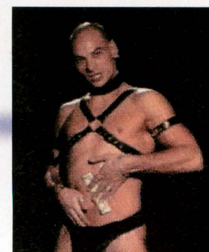

Male strippers seemed to highlight the show. French strippers competed daily against Canadians in a stage show that seemed as popular with male

conventioners as it was with female visitors. French performers “Diamond and Stephen” started their show in heavy leather outfits and wound up in white bath towels. “Daniel the Canadian” countered, starting off in a policeman's uniform complete with cap, flashlight and nightstick, and ending up in considerably less.

Other hot items included a guide Parisian erotic nightlife called *Paris Libertin*. The pocket guide to the French capital's raci-

er night-time attractions lists them by categories that include “exchange clubs,” “couples” clubs and “bars for lone men.”

Another firm represented at the show was the Paris boutique Sexy CD. Offering compact discs of photos, videos and video games with sexual themes, the owner of the store says, “They're small and discreet. You can look at it anywhere, even in your office, where many men often find themselves alone with a computer.” But we already knew that.

That Little Black Book

If you would like to “Catch A Star” of the adult kind, Arcus would like to offer you their little *Black Book*. While they may not have as many women in their *Black Book* as you have in yours, what they lack in quantity, they make up in depth and with superior video quality. Under “A,” you can get up-close and personal with Lisa Ann.

Further along, you'll find Nikki Dial, Jeanna Fine, Diedre Holland and Ona Zee.

Arcus' *Black Book* does things your little black book never could. Beyond providing you with their mailing address (via their fan club), each “page” has a full biography, a high resolution hard core gallery of photos and some of their hottest scenes on video.

The disc even looks like a black book. The interface consists of a simulated black leather address book with independent controls for all the action.

The Penthouse Interactive *Kama Sutra* **THE ART OF MAKING LOVE**

Through full-color quick time video graphics, detailed narration and stimulating sound effects, this incredible CD-ROM takes you on an interactive journey into the secret East Indian Temples where you explore and experience the 64 mythical arts of Kama Sutra lovemaking.

Each package contains:

- Beautiful 3-D rendered on-screen graphics.
- Interactive hieroglyphics containing over 90 minutes of digital video.
- Three different couples demonstrating the 64 arts of Kama Sutra lovemaking.
- Option to print the full text of Kama Sutra.
- Password protection for ultimate parental control.
- Male and female viewing perspectives.
- Anatomy rooms with x-ray viewing.
- Ability to create personalized movie for later playback.

Hybrid-Windows and MAC

instead of filling up your magazine with little photos of the CD Rom covers, why not put more information about the products? Like saying exactly what is on them. I like to know what I'm purchasing, and a little more information would be nice. I frequently feel like I'm interrogating them when I ask for more details. For example: Picture disks — how many? If I'm paying 50 bucks, I'd like to know what I'm shelling out dough for!

That's what we're here for. Over the past year or so, we've reviewed many of the discs available in the adult market. Back issues are available.

No More Seymore

Dear Shane

I hope everything goes well. Breaking up can be tough sometimes. Hope you took all the toys with you. If you're ever in Miami, FL, look me up. I might be able to help you with some locations and transportation (I have a boat). How about bar-hopping on the intercoastal waterway by boat? It might work. You never know.

Lowell K.
Miami

*Lowell,
We've passed this letter on to Shane. The rest is up to her. As to the rest of you, if you want to reach out and touch your favorite adult actress, check out CATCH A STAR on the upcoming IQ Digizine. There's also more on Shane.*

Dear IQ:

How does Shane expect to have kids when she's a porn star? What do you say when they see you in a movie? Do you simply ask, "Did you like it honey?" I do think that a young woman should consider this before entering this type of career, not after the fact.

Shawna D.
Nova Scotia, Canada

*Shawna
It might surprise you that a lot of people in this*

Playing Private Games

ARCADE GAME FANS, TAKE note. Private USA, the folks whose *Mario*-like world took a sexy turn in *Pornmania*, now bring a whole new twist to *Tetris*. *Private PornTris* offers three naughty but nice takes on the arcade staple for your PC.

One game, *Erotic PornTris* sends those odd-shaped blocks falling out of the sky, just like the arcade game. Clear a line, however, and watch a short scene from Private's collection of European erotica. Clear the screen, and you get to see the whole film in all its digital splendor.

Another version, *Erotic FaceTris* has you lining up smiley faces of different colors. Get four in a row, they disappear and once again you get a short snatch of an X-rated film. Clear the screen, and you get to see the whole thing.

Finally, there's *Erotic BubbleTris*. Aim your cannon at the bubbles. Shoot four of the same color and get a little erotic clip. Clear the screen, and... well, you know.

This brand new disc comes with over 615 Mb of movies. You can choose between beginner and advanced levels. And if you're not patient or get tired of not clearing the screens, the disc also includes a viewer that allows you to watch the scenes without the arcade interface. This is definitely not your kid's Super Nintendo game.

ERRATA

In the *Penthouse/Playboy* story in our Spring issue we spelled misspelled the name of Penthouse's Keith Ferrell.

Latex Hints & Cheats

Here are a few frequently asked questions about VCA's ★★★★★ game *Latex*:

1) *How do I get past the card-reading devices?*

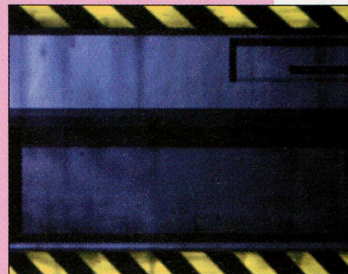

When you've viewed all the necessary kiosks to make entry possible, the device will take a card (for example, to get back into Noble Asylum, you must first view all of the Kiosks on Hampshire Drive and Pool Avenue). You must then crack either a musical code or a number code, depending on where you are. For the musical code, the computer will give you a melody that you must match by using the keypad. It's tough, especially for those who aren't musically inclined, but use trial and error, and persistence will prevail! The number games are a little trickier. With them, you must guess the correct number code by first making blind guesses, then educated ones after the computer tells you how many numbers and positions you got right.

2) *Where do I find the clues that will allow me access to the Cyber-Babe?*

You will find four clues on the walls in various rooms of the game. They all contain a Greek letter and a two or three digit number. When you find the Cyber-Babe in the Secret Room, you'll need these codes in order to get a chance to satisfy her and advance to the next level. A good technique when exploring is to walk around the perimeter of a room, looking to the side after each step forward. This insures that you'll have examined every section of wall space.

3) *How do I get from the Megasplash room to the Inner Sanctum?*

You've almost won — but there are two statues in the way. There's a device in the first room of Noble Asylum that not only will give you a clue as to what to do with the statues, but will also allow you to do it.

business, both on screen and off, have relatively normal lives when they're not working. Of course, when some of the actresses marry, they quit the business. Judging from the article in our last issue, I'd think Shane will be a really responsible parent when she gets around to having kids.

Dear IQ:

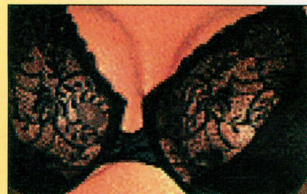

I'll never buy another adult CD product without reading the IQ review first! Great mag, and the idea of printing hints is a great service to your subscribers.

Tom O.
Philadelphia, PA

Boob Patrol

DEAR IQ,
This may be an inane question, but have you ever noticed a really great set of breasts before? Me too. Pick any good adult CD-Rom off the shelf, and you can bet the majority of women in the title have a superior set.

Breasts are hypnotic, trance inducing appendages. Sure, there's a lot to be said about a woman's legs and butt, or perhaps her eyes or hair, but the number one, all-American standout are the boobs. Look at the facts. There are more slang words for breasts than any other visible portion of a woman's anatomy. Poster and pinup girls from the last hundred years have noticeably impressive chests. Of course this is because large breasts are symbols of femininity, fertility and a great time in the sack.

The nagging question that always comes to mind as you observe a straining blouse, full sweater or a bikini top about to burst is: Are they real? The second, more obvious question is: Who cares?

According to those in the know, 91% of men claim to have known, met or

slept with a woman with implants, yet only one woman in 65 has undergone breast augmentation. This is interesting. Either men are lying, or women with implants really get around. You make the call.

Where are these women you wonder? My own observations (made purely in the interests of good journalism) lead me to believe the vast majority of them habitate in southern California. Just check out the beach this month. The girls of *Baywatch* notwithstanding, there are just too many large, perfectly formed, unrestrained, gravity-defying hooters on my beach for them all to be real.

One place that doesn't seem to have a lot of augmentation going on is New York City. Although it seems puzzling at first, the reason is clear: it's the wind and the brains. Women in New York spend more time with their clothes on. Given the often inhospitable climate for bikinis, halters and what not, women don't seem to need them as much. Women who spend 75% of their lives wrapped up in baggy sweaters just don't feel the same pressure.

Another more telling reason seems to be most women in New York would rather be appreciated for their minds. As crazy as this seems, it's true. Think about it. New York is known for the Met, great bookstores, and theater, whereas Los Angeles is known for roller-skates, convertibles and movies. No one doubts New York is a great place, full of intelligent, beautiful women, but where would you rather spend a sunny afternoon?

No matter where you live, or if you prefer the real thing, we should all keep a keener eye out for augmented breasts. Try to spot that 1 in 65. Invent your own observational method of separating real from man-made. Keeping in mind that the only way to know for absolute sure is to ask her or actually touch the bare beauties, you'll have to be inventive. Keep me informed of your progress and changing statistics. I'll be on the beach continuing my own research.

Smart Virtual Women

It Does Take a Rocket Scientist

BY SCOTT WOLF

L to R: Dave Morris, Girlfriend
Donna, Michael Massad

There's more to Girlfriends *Lisa*, *Teri*, *Suzy*, and *Tracy* than cheap thrills and instant gratification. Hiding behind the glamour lurks a sophisticated Artificial Intelligence engine that can learn and remember new words, names, dates, and events. David Morris, President of AIVR and inventor of the Virtual Companion, has a lot to say about the AI aspect of their product. A pioneer in the field, he has worked on creating software to make computers recall, respond and think for nearly twenty years, with such heavy duty organizations as the Laser Weapons Lab. "I got interested in AI in 1977," he says. "There was a program called PacBot that allowed ham radio operators to use terminals to communicate with each other. I wrote a program that allowed them to carry on what they thought was a conversation with me but was, in fact, a con-

versation with my computer. It was smart enough to understand what they were talking about and carry on entire conversations with them."

By 1986, *Who's Who in the Computer Industry* cited Morris for a database query program he wrote that would understand questions typed in plain English. As the IBM PC started to shake out as the platform of choice around 1989 he decided to rewrite all of his early programming (made for platforms like the Z88) for the PC. That's when the *Girlfriend* series was born.

They say it doesn't take a rocket scientist to create an adult game. So, how did a bunch of high-end computer jocks and actual rocket scientists find themselves programming artificially intelligent naked women? That falls more under the prime directive of the marketplace than

Windows, with full motion video. You can interact at the same time you're watching the clips. Morris describes Donna as a "fluid, continuous, full-motion game." Advances in the graphic technology as well as additions to the AI engine give her much more capability for conversation.

"They're not 'click-on-the-play-button' linear transfers."

computer science. AIVR merely gives the people what they want.

"The first one, *Girlfriend Lisa*, was totally G-rated,"

Morris explains. "Everybody that bought it called up and said, 'Hey, I told her to take off her clothes and I got a blank screen.' I said, 'I didn't think you were gonna wanna do that!' We tried to satisfy those people with our next product, *Girlfriend Suzy*.

Each subsequent girlfriend represents a technological leap. Lisa consisted of scanned all-still photos, about 100 images. They recorded Teri with a camcorder, and she had 300. Tracy has 1500 still images plus some full motion.

AIVR tentatively calls their next title *Girlfriend Donna*. Donna will run under

There will be no play button. You're going to interact with her while the full motion is on the screen. With each product, we get more and more depth into the personality. For example, the new one we're coming out with is going to have some sexual peculiarities associated with her personalities. It will definitely be an interesting challenge. You're not

going to pop her up on the screen and start taking off her clothes and be done with it in 15 minutes. This will have some more interesting challenges. You don't just click on her boobs and have her take her shirt off — that's not reality. You strike up a conversation with her, you have to get her in the mood. Imagine if *Virtual Valerie* or *Space Sirens* had a conversational interface. You could develop a much richer, much deeper adventure where you're interacting with somebody who remembers what you did last time, what they liked or what you liked. We've had many opportunities to do really hard-core stuff and still use our AI interface but we chose not to."

Morris' "Girlfriends" do use a lot of extreme technology. If the "Girlfriends" represent the most interactable software, it just shows how far software has to go. For instance, as with so many live nude chat facilities, you don't converse with a "Girlfriend" so much as type to her. But as voice recognition software comes into its own, expect AIVR to include it.

The time is coming for AIVR's variety of artificial intelligence game engines. Morris foresees a great leap when the speech recognition engines get fine-tuned to the point that they enter the consumer marketplace.

"As voice recognition becomes integrated into games, we'll be the only people that can take advantage of it in any kind of in-depth fashion. We already take sentences that a person 'speaks' and have them understood."

AIVR looks beyond their current 'Girlfriends' these days, as well, exploring other avenues for their engines. "We're designing adventure games right now where the goal is not to kill your way to the end, but to form relationships with the characters that will give you the key to success. Nobody else can do that." **IQ**

Are Women

Introduction

Drama at Hama

BY MARK BROWN, PUBLISHER

Recently, on our West Coast tour, associate publisher Rick Murphy and I were dining at the trendy *Hama* Sushi restaurant in hip Venice, California. Of course, we always travel with several copies of our latest and greatest issue. Suddenly *IQ* became the hot topic at the table behind us with several lovely young ladies. As they grasped and fought over our mag, they shared their varied opinions with us.

One British babe overheard the buzz as she squeezed between our table and the bar. In the verbal equivalent of a

conversation with the Brit. I felt her concern probably went beyond her own personal 'manhunt' and actually had some merit. Certain questions came to mind. Do adult CD's allow men to withdraw further? Could they actually replace women? Is the Internet keeping us sexually satisfied?

Patty, our lovely waitress (and former 'lip model'), quickly joined the fray and added, "she recently was a production assistant" on a new

Will vicarious sex replace the real thing? Will the eligible men now spend Saturday nights at home with their hard drives, hard-ons and virtual women?

drive-by shooting, she machine-gunned us with her worst nightmares. She felt that adult CD Roms were threatening to women and she was convinced that guys were happy and satisfied to interact with their computers rather than go to bars and buy her drinks. She blamed the fact that there are fewer eligible mates on computers and technology. She imagined they were home Saturday nights with their hard drives and hard-ons preferring virtual women, endlessly manipulated and safely controlled to the unfathomable and all-too-emotional real thing.

Finally, our sushi arrived.

After several glasses of saki, I started thinking about our

adult CD-Rom and thought it was great fun. Patty didn't feel threatened at all. But she should have. I had to ask her three times for extra ginger.

Anyway, that's how the 'Drama at Hama' began. When you get this much reaction while just trying to mind your own business and sop up the saki, you know you're on to something.

When we got home, we e-mailed our writers, asking them to come up with story ideas based on our experience.

I guess we owe a word of thanks to the Girls of *Hama* Sushi. Do you think they'd like to star on the next great disk?

I doubt it.

Obsolete?

The End of Sex?

BY GARY SAGE

I've had sex with several women I've never met. It's becoming more and more common. I've also shared the experience with a friend. We had sex with the same girl, although not at the same time. I think our experience brought us closer together. We talked a firestorm about it. Come to think of it, I've probably had that kind of sex with some of the women you've had sex with, even though we've never met.

No, I'm not a member of some sort of "Swingers Club." Think Juli Ashton, think Christy Canyon, think Ginger Lynn. I'm sure you know what I'm talking about. Cybersex, in its many flavors. I've probably had more sex with virtual women, on a "per orgasm" basis, than with women wrought of flesh and blood. That's probably true of most men out there today.

For example, according to the July 3, 1995 issue of *Time*, a Carnegie Mellon study titled 'Marketing Pornography on the Information Superhighway' found 84% of pictures on Usenet groups were of an erotic nature, and that "sexually explicit imagery is now one of the largest (if not the largest) recreational applica-

tions for users of computer networks." The study also noted that 99% of users were male.

Is it possible that someday men and women will retreat into their respective corners and be content to play with electronic images of each other? Will you still be able to go out and get laid on Friday night?

"Sex chat is always fun if you have a good imagination, and if you are also

good at describing your intentions," says J.C. from North Bay, Canada. "GIFs and other pics are okay, but you get bored with them fairly quickly. I suppose my favorite spots for cybersex, at the moment, are Web pages on the net. There are a couple of really classy places out there. One of which is Sizzle (www.sizzle.com). Another is Club Love (www.adultplayground.com). Currently I'm a member of Club Love. I'll be joining Sizzle soon enough."

The growing number of women who use the chat rooms also find it stimulating. "I was curious in the beginning," says Rhonda, a redhead from the Midwest. "Not to the extent of masturbation — but I was curious to find out what interests were out there."

Studies show that over 90% of men masturbate at least once a week. One study noted that "most" men use some sort of visual "stimulant" to "facilitate" their "experience." What a surprise.

"I have to admit it," says Mark, who's 29 and works in a large insurance company, "most of the girls I think about when I get off are porn stars. I've been with the same woman for three years, we're probably going to get married. I

Are Women Obsolete?

love her, but we've done everything we're going to do sexually. It's not like I'm not satisfied, and I don't want her to be like a porn star. I just find it, I don't know, interesting, I guess, to see other women."

Like a lot of men, Mark views adult software to fill out his sexual experiences, despite having a long term partner. Guys can now exercise quite a few options to "facilitate" their "experiences." With all the new choices around, bet on the *Interactive Adventures of Seymore Butts* giving the *Playboy*-type magazines a run for their money.

But even *Playboy* has been around for over 40 years. So what's the big deal now? Is cyberotica, or any erotica something for women to worry about? Do women see a real danger? Have we perfected the ultimate sex toy? Men masturbated

before the advent of printing presses, modern erotica, and videocassette recorders. Is it possible that men might

actually lose interest in real women?

"Are you kidding? That's crazy," says Mike, who's 22, a student and currently

of no fixed female address. "I liked *Virtual Valerie*, I liked *Virtual Sex Shoot*, but I don't know what I'd do if I couldn't have sex with a real woman again."

Sounds like some bad science-fiction writer's premise for a short story. Any high-testosterone male will tell you that it would take a pretty serious dose of modern technology to make one forget real female flesh. On the other hand, that doesn't mean they will keep making an effort to maintain a relationship.

"Bob" stopped dating. He got tired of the whole routine. It started with adult films. He liked to watch them with his

"I've had boyfriends that liked to watch adult films, and they were always trying to get me to do all these weird things in bed. That wasn't always bad. I've learned a few things that way."

Victoria, Age 27

Jacqui St. James: Get It Any Way You Can

BY EVAN ROBB

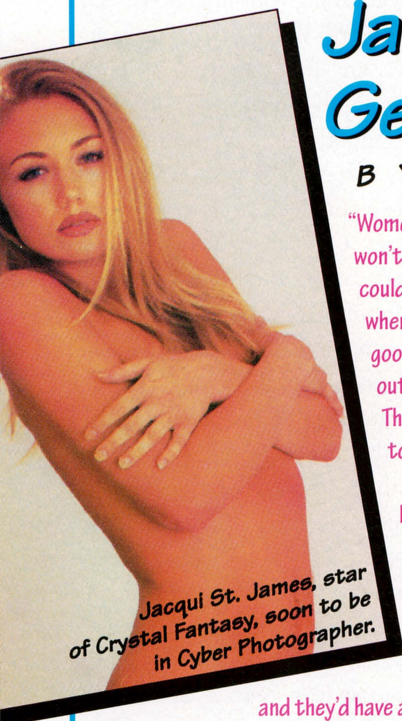

"Women won't become obsolete unless they come up with the perfect android. That won't happen in my lifetime, so I'm not worried. As far as virtual reality goes, if they could come up with something like that TV show *VR 5*, or the movie *The Lawnmower Man*, where you're in a completely different world, and if the virtual sex could feel just as good as the real thing, then, yeah, I could probably get lost in there and never come out! For now, everyone wants the 'real thing.' I don't think that's going to die off. There's real sex, computer sex, phone sex ... each thing's different. People are going to get sex any way they can.

"Before I got thrown off AOL for having topless pictures on my home page, I was having cybersex just about every night. I was happy and it was totally cool. It was

I was having cybersex just about every night. I was happy and it was totally cool. Ultimately, cybersex helps men and women relate.

fun meeting all these crazy guys on-line. I'd tell them to download my picture and they'd have a heart attack. It got kind of carried away, with so many guys — my computer would crash from all the instant messages. There would be all kinds of guys — some would try to come on and be Mr. Stud, some guys would want to be my slave. I liked the slave guys. They'd call me "Mistress" and would do whatever I said. Sometimes I'd bring five or six of them into a private chat room and have each one doing a different thing, and I'd be Miss Princess.

"Ultimately, cybersex helps men and women relate. You can experiment with different things, you can't get a disease, and it's not really cheating. As long as a couple is honest about it, there shouldn't be a problem. If anyone's jealous about their partner going on-line, they should just go on-line, too. There's nothing to be jealous about. Get over it. My boyfriend has no desire to do cybersex, but he's okay with me doing it. I make time for him too, so he's happy."

Jacqui St. James, star of *Crystal Fantasy*, soon to be in *Cyber Photographer*.

Are Women Obsolete?

girlfriend, to be turned on. Several of his girlfriends didn't approve. Now he has turned to cyberotica on CD-Rom and pretty much given up women. About once every two weeks he uses the services of a professional prostitute. Sometimes he picks them up on the street, sometimes he has them come over to his house. It's never the same girl twice.

In between Bob collects, downloads, and views hours and hours of adult material. His favorite form of erotica is still video cassettes, but CD-Rom interactive games are a close second. He wants to learn how to program because he feels there's much more to be accomplished with interactive adult product. For the moment, he has no interest in finding a permanent serious relationship with a woman. He is, he admitted, slightly concerned with finding a companion for his old age, and he's not very optimistic about it. At least he knows he'll always be able to make friends via the Internet.

Bob has withdrawn from the wars. Most people would agree that in North America in the late 20th century, men and women are re-negotiating the relationship between the sexes like no other place or time on Earth. At the same time the adult entertainment industry, from old fashioned magazines and videos to new cyberotica, grows by leaps. The way these two facts seem connected has gotten some people worried.

"Virtual women," sneers a real woman from New York City, "are for men who can't get out in the real world and find REAL women. They have a reality problem. They need to face their fears of being with a real woman."

"They need to get a life," Rhonda concurs. "That's saying it mildly — but they are probably too insecure — and that is one reason why I feel that they prefer the cyber thing."

These two available women have very strong opinions on the issue. Ironically, this may be one of the causes of men

Shane: Plenty of Men!

"Men can experience computer women first, without worrying. People feel more comfortable dealing with a computer, and that helps them feel more comfortable when dealing with real people — it's a step-by-step process. Men and women have problems communicating about sex and computers can help.

"On the other hand, when I listen to talk radio, women complain that their boy friends and husbands are on their computers too much — now women have to worry about both sports and computers!

"Both men and women should pay more attention to their partner's needs. That's why there's going to be a 'helpful hints' section in every volume of *Shane's World* (her upcoming video and CD Rom — the first one on her own). We'll cover topics like how to get your partner excited, how to give good oral sex, better hand-work, and anal sex.

"As far as the technology goes, there's room to improve, and get more realistic. I'd love to see someone take a toy like the Sybian (a sit-down "internal massage" device for women — for a demonstration, see *Seymore and Shane On the Loose*, part of *Seymore's CD Rom Six Pack*), and design it so that you could hook up to the computer. That way you could be watching a scene, and it would vibrate harder as the scene gets more intense. They could do the same thing for guys, using jack-off machines. I think that would be totally awesome! If someone does it, I say buy stock in the electric company.

"But women not being able to get a date? No, impossible! If that happens to women, they're just interested in the wrong men. I'd just say, 'Adios amigo' — there are plenty of men out there."

- Evan Robb

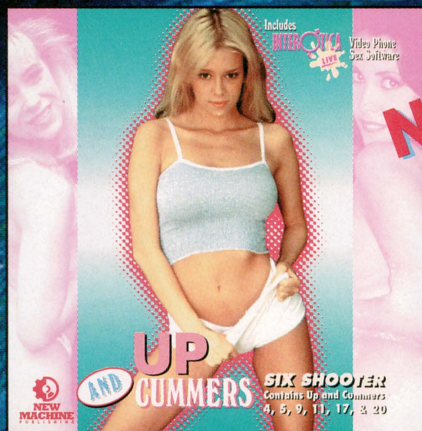

Shane, star of
*Adventures of
Seymore Butts 1 & 2,*
and the upcoming
Shane's World.

I'd love to see someone take a sex toy and hook it up to a computer, so that you could be watching a scene, and it would vibrate harder as the scene gets more intense. If someone does it, I say buy stock in the electric company.

THE SIX PACKS

GET MORE BANG FOR YOUR BUCK!

Are Women Obsolete?

withdrawing. Mike waxes nostalgic, for example, about an earlier era. "My friends and I talk about what it must have been like in the 60's with easy going free sex and all that," he says wistfully. "Girls are real demanding now."

"I honestly feel that half the fun in dating and having sex is the chase," smiled Verona, a married woman from the East Coast. "Do you think that will stop? I don't."

Well, it has for Bob. Virtual women do it for him better than the real thing. But a rivalry with virtual women has

husband. He thinks nothing of it. He claims that it's just harmless fun. A little "hot talk." It's cheaper than phone sex, and more exciting, he claims.

Now Suzette doesn't know what to do. She hates the thought of her husband talking dirty with some other woman neither of them has met. Her biggest worry is that her husband will want to meet this "other woman" in person. The husband insists that it's nothing. Suzette is thinking about a preemptive divorce. She's never been on-line and now doesn't even want to

**"It's
feminist bullshit.
I'm sick and tired
of it. I've been reading
Playboy since I was old
enough to buy it, and I've
had girlfriends all along."**

Ken, Age 33

Suzette thinking about divorce. She's discovered her husband cheats on her. Sort of. He spends up to five hours every night talking to a "friend" on the Internet. The majority of the traffic between the female friend and Suzette's spouse is sexually explicit chat. Suzette discovered this one morning when her husband left the computer on after practically passing out beside it. While he slept in the bedroom she "scrolled" through an entire chat conversation and found out all the things her husband and his "mistress" have been doing to each other in cyberspace.

Suzette was shocked at first and hurt. Now she's angry. She confronted her

try. Suzette is 34 years old, her husband is 38. They've been married seven years.

"Cybersex is fun and entertaining," says D. Fu from Singapore. "It sometimes makes my girlfriend jealous. Especially when I'm too tired to go on a date and cybersex played a major part in how tired I am."

Is the rise in the availability of erotic entertainment a result or a cause of the re-negotiating that's going on? Is it truly possible that someday, like that dystopian sci-fi vision and, given the technology, men and women will retreat into their respective corners and be content to play with electronic images of each other? Or is this part of

Continued on page 51

Tyffany Million: Men Want Mystery

"For men who have healthy relationships with women, cybersex can add an element of mystery and excitement. One can lose that, especially in a long-term relationship. Some women may be jealous, or feel that the man is ignoring her, but they just need to realize that as long as the man isn't going out and having sex with other women, there's no harm. It doesn't mean that the man doesn't love his wife or girlfriend. He's just looking for that mystery and excitement. Women need this, too. If the couple can share the experience and stay frank and honest about it, it can be a great addition to any healthy relationship."

"That's just one type of man. The type of man who would consider real women obsolete just because he can manipulate cyber-women at his leisure is not the type of man a woman should want to be with in the first place. He's not in the real world. A woman doesn't need a man like that, who doesn't desire a relationship with a human being, complete with emotions, interests, thoughts, and opinions. I've met men like that, who are threatened by a woman's sexual power. They have no clue and I wouldn't get involved with a man like that if my life depended on it. I have my own needs and desires. I need the human element to get excited. I find cybersex too impersonal. It's all in black and white letters. No way could it replace the real thing for me."

"Women should welcome cybersex with open arms, though. On the one hand, it's a weeding-out process — the undesirables will be stuck to their computers at home. With men who desire real relationships, it's just a variation, so where's the harm?"

-Evan Robb

**Discover You Are Not Alone...
and Venture into the Mind of
ERIC KROLL
& EIGHT BEAUTIFUL WOMEN**

ERIC KRÖLL
F E T I S H

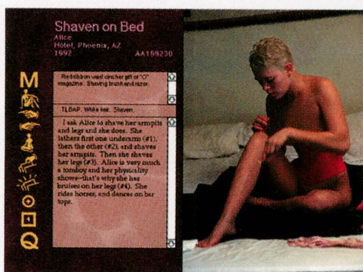

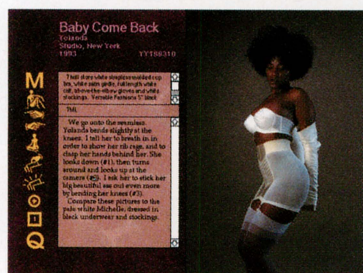

Behind the lens and inside the mind of one of the world's premiere erotic art photographers

DUAL PLATFORM

**CD-ROM for both
Windows™ and
Macintosh™**

In his first CD-ROM, Eric Kroll invites you to venture inside his studio to lay bare eight beautiful women models. They pose in vintage underwear, outrageous rubber, PVC, and black leather. Many pose topless, bottomless, and nude. Some submit to stringent bondage, others stand defiant with whip in hand. Watch them put on make up, fix their hair, eat, dress and undress, and shave. There is no privacy. Both you and Eric are behind the lens. More importantly, you venture inside Eric's mind—inside this fascinating and fertile imagination as he vividly explains how he meets his models and the collaboration that goes into the creation of these stunning, erotic, and unique photographs. Eric has just sold 90,000 copies of his book **Fetish Girls**, and fans continue to grow.

FIVE STARS!

Erotic Art At Its Very Best

By Evan Robb

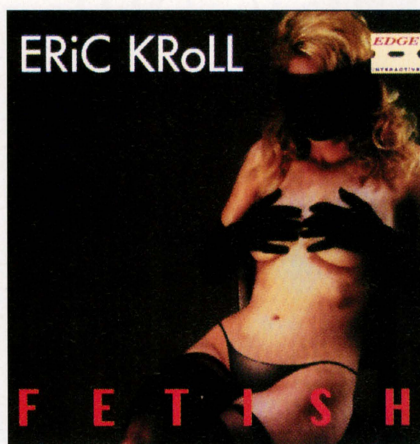

"I ask her to open her legs and she complies obediently," photographer Eric Kroll tells us as Michelle poses in handcuffs. "She waits, relaxed, for my next instruction."

One of the eight women on this CD, Michele has striking eyes, dreadlocked hair, and exotic piercings. Kroll compares her to the women of the Minoan culture, who "rouged their lips and nipples, had wild stringy hair, and rode bare-back on bulls!"

This picture disc stands far beyond any other. First of all, you'll find no bimbos here. Each model has a strong and distinct personality, whether she's dominant or submissive. Kroll, a true artist, is sensitive to their individual personas, and plans each photo shoot accordingly. He photographs Sheena, a buxom brunette, at *The Vault*, an S&M club in New York City. There she kneels on a red couch and drips wax on her body from two black candles. Kroll is just as fascinated as we are, and observes, "Her body is her art. Sex is her medium."

Kroll's narratives describe each set of pictures. They focus on the beauty of the women themselves, and draw the attention of the viewer to the more subtle aspects of the fantasy scenarios. This heightens the impact of these already scorching photos to the point of near-meltdown.

The disc contains from ten to twenty segments for each of the models, totaling over 700 24-bit pictures. In addition to the play-by-play commentaries, Kroll writes about the models themselves and how he met them. Knowing about the lifestyles and personalities of the models

makes the connection even deeper. About Mistress Avalon, a professional dominatrix, he writes, "Please note that you will never see naked pictures of (her) — she will not allow anyone but her lover to see her so — it is too great a privilege." He also describes the dungeon where she works, and what a paying client may expect from a session!

Kroll's trademark "nothing-is-sacred" attitude means no moments are too private. He photographs his models while they shower, sleep, shave, and apply make-up. (He even has Michelle stay naked while she eats falafel — every vegetarian's dream!)

If you find the interface less than intuitive, read the instructions (when all else fails...). Once mastered, not only can you zip around from one menu to the next, you can search by keywords, create a folder of your favorites, and even search by which body parts you'd like to see exposed!

In addition to the photos, The CD offers short behind-the-scenes QuickTime movies

on seven of the girls, a listing of about 100 clubs, organizations, stores and catalogs pertaining to fetish erotica, and a piece written by Kroll's wife on what it's like to be married to him. Information on what photo and lighting equipment he used makes this CD a must for the budding erotic photographer, as do his discussions on the aesthetics of his work. **IQ**

Turn-on is Easy, but Lovemaking is Hard

By John Everson

Get Jill nice and relaxed with a backrub.

The premise to this one is simple, but the execution is hard - and I don't just mean its effect below your belt. The three adult movie stars of this interactive game will get you excited fast, but pay too much attention to your own lusts and you'll lose the game.

Here's the rub: choose one of the three lovely ladies and use a number of foreplay methods in tandem (identified by graphic photos spread around the screen), to help her achieve orgasm. She then will reward you with a session where you call the shots. Get all three women off and win a "boner bonus" session.

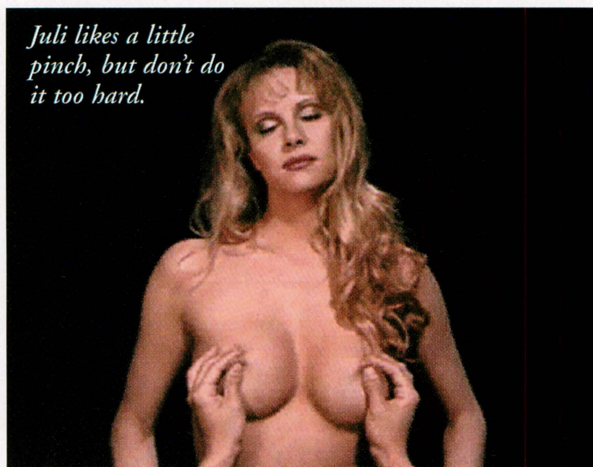

This is not an easy task. When you choose one of the foreplay icons, you must hold down your mouse button for as long as you'd like the action to continue. As you do this, a video clip of the women undergoing your chosen action plays in the center of the computer screen. But next to it is a thermometer dubbed the Climaxitron. When you're

turning her on, the mercury goes up, as does your score, and a green light flashes. When you're boring her, the points and

Play too fast with the dark-skinned Asian girl and she'll put you down as being "just like all the other men."

mercury plummet and a red light goes on. Each time you gain 1,000 lovemaking points, you reach a new level of sexual

Juli likes a little pinch, but don't do it too hard.

intensity, and gain new icons to use, from dildos (don't forget to use the lube button) to ice cubes on nipples to leather whipping straps. Lose the girl's interest for long and you'll get booted back to the beginning with a cold put-down like "ouch, you could use a manicure," or "I do like it rough but I'm getting bored."

As hot, busty blonde hostess Juli Ashton explains at the outset, this game tests "your knowledge and sensitivity as a lover." That's not exactly the case: I've

never had to go back and forth between rubbing a woman's crotch with her leather underwear on and rubbing her unclothed. To pass one "level" of love-

making with Ashton, you have to. It makes no progressive sense to keep bouncing between her naked and g-stringed crotch, but you just have to follow the women's lead to be a good lovmaker.

Jill, a tan and tawny blonde, tells you at the beginning of your session that she likes a "tough man". But use the "tough" icons on her too early and she'll dump you

quicker than a cigarette butt. Kia, a caramel-skinned Asian girl begs for a sensitive, caring, gentle man. Play too fast with her and she'll put you down as being "just like all the other men."

The game features a "Camera B" option that offers a close-up view of the action. Beware of watching too closely, though. The girl may be moaning in heat on the screen, but the Climaxitron could still be falling. This game takes concentration and quick reflexes to "keep it up." **IQ**

Ed, to the 6th Power

By Richard Freeman

There are cheaper and more satisfying ways of losing weight than going to Jenny, just as there are more stimulating brews than a six-pack of beer. No one knows this better than Ed Powers. For less than a month's worth of coffee and Danish, you can own this collection of CD's which includes *More Dirty Debutantes* Nos. 8, 9, 14, 18, 21 and 22.

For those of you who aren't familiar with his work, Mr. Powers' specialty is recording women for their first time on video.

No way could we list everyone in the 41 scenes on these six discs, but Francesca Le is on No. 18, while Teri Weigel is on #9. You will want to turn down the sound here. People sometimes mistake Teri for a malfunctioning fire alarm or a World War. Anyone familiar with her antics knows what I mean.

More Dirty Debutantes No. 22 has Umma (not the UFO conspiracy, but that homey of Ed's from Brooklyn who sometimes pretends to be from Alaska), while No. 21 has Lydia Chanel. It also features an incredibly wild encounter of the third kind between Rocco Siffredi

"People sometimes mistake the loud, but lovely Teri for a malfunctioning fire alarm or a World War warning."

Go Fish

By Richard Freeman

I'll never go to Vegas to lose my money on poker. See, I can never remember if

"I wasn't even aware that they made sex dolls for women, but you can see for yourself that someone has."

a flush beats a straight. This doesn't mean I can't win at cards, though. *Fuzz Buzzers* gives me the chance to excel at Fish, a game well within my intellectual capabilities. When I win, by matching playing cards of, say, Rebecca Bardoux, I get to have her appear and talk to me while she does a short solo act. But that's just the first level. When you boot up *Fuzz Buzzers*, a young woman explains this in either German, Italian, French or English.

If I'm really feeling hot and in touch with Lady Luck, I can go to

level two and match sex toy cards. When I win, Kirsty Waay plays with four or five different toys. I even get two choices of where she'll put each toy.

I wasn't even aware that they made sex dolls for women, but you can see for yourself that someone has. There are five actresses, so there are at least forty possible combinations to work out.

A third level has only two cards that match out of 15. The game is timed, so it makes more sense to play in a random fashion than to try and use memory, especially since they shift the cards around for each game. If luck is with you, you get to see a young woman have sex with someone's anonymous fingers. They're supposed to be yours, of course, but I'm sure that you're busy shuffling cards and getting ready for your next hand. **IQ**

Go Fish for adults.

and Bonita, Ed's sometime camera-woman. It probably took her a week to refocus after this anal adventure. Mia Powers (no relation to Ed) and Nasty Brother Jamie Gillis star in No. 8, as do Cameo and Nicole London.

My own favorite clips are on No. 14. A very young Kelly O'Dell has two scenes, a girl/girl and a girl/guy/girl that

probably made Ed feel a lot older than the 37 he sometimes pretends to be.

Also on No. 14 is the lovely Marina. She does several scenes with faceless men, though the vocal organs on one belong to Randy West.

If you don't already own a slew of *Dirty Debs*, this is obviously the place to start. **IQ**

Are Women Obsolete?

Continued from page 28

a more significant shift in the fundamental nature of interpersonal communication in our culture? Will you still be able to go out and get laid on a Friday night?

Erotica has been with us for a long time. In all likelihood (barring any unforeseen redirection of the U.S. Constitution by the likes of Bob Dole), it will continue to be with us for a long while. However, how many people would argue that it serves as a complement to, not a replacement for, immediate face-to-face (or other positions) sexual relations

with real humans?

"I could give up the videos, and the games," Mark remarks. "I wouldn't be happy about it, but if my girlfriend insisted, I would get rid of it." Could he get rid of it, and never look at it again? "I don't know. I can understand why she doesn't want it in the house, but I think it's my business."

A great debate rages in academic circles as to whether erotica actually alters behavior. Most men would argue that it does not.

"All that is just shit," says Ken, a 33 year old accountant who enjoys playing adult games on CD-Rom (even though he doesn't see a lot of *good* games). "It's feminist bullshit. I'm sick and tired of it. I've been reading *Playboy* since I was old enough to buy it, and I've had girlfriends all along. Some thought it was cool, other ones couldn't look at it."

Does the possibility exist that adult entertainment could change men's perception of, and perhaps their relationships with, women? Even at a sub-conscious level? Many women will argue this point.

"I've had boyfriends who liked to watch adult films," says Victoria, age 27, a waitress. "They were always trying to get me to do all these weird things in bed. That

Juli Ashton: The Smell of Sex

Juli Ashton, star of *Nasty Parts*, *Porno Poker*, *Latex*, *VCA Photodisc*, *Virtual Sex 2*

"I go on-line and chat all the time. It's a great way to explore fantasies — I can be as wild and adventurous as I want. On-line I tend to be dominant, when in real life I'm not. I've taken on six or seven guys at a time in private chat rooms, and it's a challenge to keep everyone satisfied. I like the CU-See me stuff. Mutual

That intense smell of sex can't be reproduced, even with smell-o-vision.

masturbation, when you can actually see the person out there, not just the words, that's the ultimate for me so far.

"But I don't think computers will ever replace real women. People need human contact — the physical sensation of being touched, the intimacy of looking into each other's eyes. Subtleties like the way a person's hair falls across your face as you're lying together, how they sigh, and that intense smell of sex — I don't think that could be reproduced, even with smell-o-vision.

"If computers have any affect at all on relationships, they should just add to the excitement. Couples can use adult CD-Roms to become aroused together,

just like adult videos. Any women who are jealous when men use erotic software were probably jealous of computers in the first place. I say, learn how to use the computer and join in!"

—Evan Robb

The concept of virtual women has Suzette thinking about divorce. She's discovered her husband cheats on her. Sort of. He spends up to five hours every night talking to a "friend" on the Internet.

wasn't always bad," she admits, "I learned a few things that way."

Women worry that erotica, in all its many flavors, turns them into objects of sexual pleasure, and thus men start to perceive women as sex toys. Interotica takes this fear one step further. Instead of just depicting women as objects of pleasure it actually allows men to manipulate these cybergirls for their own pleasures.

"For me the worst part is about being

Are Women Obsolete?

used," continues Victoria. "I've had times with boyfriends when I feel like I'm just being used for sex."

What some women worry about (see Mark Brown's piece above) is that men will take Bob's tack, withdrawing from everything. Going out to "get lucky" in this day and age has lots of people of both sexes worried.

"I don't think we're ever going to get a game so real that if a girl showed up, I'd be like, 'Sorry, I'm playing this game'" Mike states.

"Go into a room full of guys playing a CD-Rom and offer 'em a naked woman, any naked woman," says Stephanie from Spokane. "Most will stop playing ... as long as they heard the announcement!"

"Do you seriously think people are going to pass up the real thing for a CD Rom?" asks Verona. "CD Roms cannot replace the closeness and intimacy that we humans so desperately need. That is why sex will not ever be replaced."

In that case, cyberotica won't replace sex. It can be a remarkable simulation, though. It's not as much fun if you are consciously aware that you're playing a game. The makers of these interactive fantasies happily oblige this craving for realism, now that technology makes it possible. The more real and convincing they are the more likely we are to forget we're playing games, which is both the pleasure and the peril in playing.

"Cybersex is certainly an interesting market", Joel R. from Switzerland says. "But a lot can be done to improve it."

Can women compete with fantasy models that are physically perfect, perfectly willing and expertly skilled in every sexual way? Would they want to? How much will women put up with?

"Cybersex has taken a huge leap in the last few years," adds D. Fu. "Diva X is amazingly interactive and I am eager to see what the next few years will bring. It

women compete with fantasy models that are physically perfect, perfectly willing and expertly skilled in every sexual way? Would they want to? How much

Paisley Hunter: The Siren Speaks

"Personally, I don't get off on cybersex, but to each his own. I know there are people out there who would rather use a CD Rom than try to ask someone out on a date, because there's no risk of being rejected. They think that with all this technology there's no need for humans, but it's not realistic — you're missing out on the physical contact of a real woman. The old-fashioned warmth of having somebody in your arms.

"If it's just for entertainment, then I don't see anything wrong with it. Everything has to have a balance — to do too much of anything isn't good for you. There are so many other things that people could do that are bad. If it's keeping people out of trouble, and it's not an obsession, then I think it's okay. Moderation is where it's at. If people stop dating to do it, I think that's a problem, but that's just my opinion. I'm very open-minded about other people's lifestyles. But most people want to be able to one day settle down with someone. There are a few good men out there who want down-to-Earth relationships.

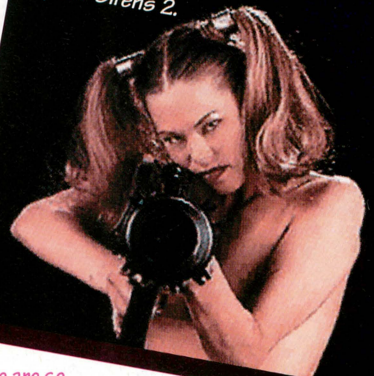

"Doing *Space Sirens 2* was a way for me to act out a part of my fantasy life — getting to dress up in the outfit and acting out the attitude of, 'Do what I say or I'll blow your head off!'

There's a side of me that has that attitude, so it was a natural thing for me to act on. I have that dominant edge in real life as well. Doing the Rom was extremely entertaining to me, and I'd like to work on more."

-Evan Robb

Space Sirens 2 was a way to act out part of my fantasy life — the attitude of 'Do what I say or I'll blow your head off!'

Paisley Hunter

Space Sirens 2.

will women put up with? Cyberotica seems to offer little up-side for women.

Victoria admits, "I don't know if it's because of adult stuff, but I think guys need to be more considerate."

So where does that leave everybody? It leaves some guys with their dicks in their hands and girls pissed-off. Neither side seems willing to compromise, nor do they seem willing to give up on making things work. Women have to understand that adult entertainment for men is here to stay. Men have to accept the fact that women don't like it. Which means we're pretty much back where we started — making it up as we go along. Which isn't all that bad. **IQ**

Are Women Obsolete?

Live Nude Chatter

BY "COLETTE"

When I was growing up, my friend Sheila always used to date the geeky guys. Together they would solve the latest calculus equation and argue Newton's laws of physics. One day, I asked her what the heck she was getting out of this whole thing besides better grades. She looked me squarely in the eye and argued, "Colette, didn't you know? The largest sex organ is the brain."

Twelve years later, time and technology prove Sheila right. Again. Brains and beauty can not only work together, but can keep you healthy, wealthy and happy, at least on the Internet.

Two newer friends, Brandy and Megan are two of the happiest women I know. They call what they do for a living "a

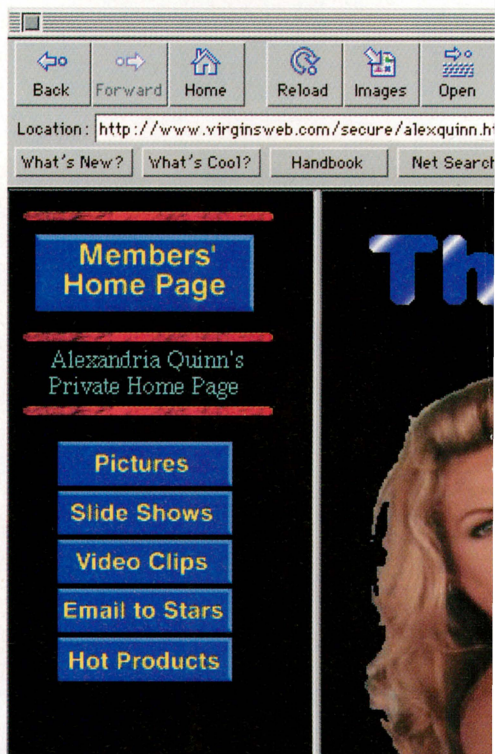

job." I call it living the life of leisure. Who else gets to clock in, put on an evening gown and spend the rest of their time sharing secret sexual fantasies and masturbating with interesting men from around the world? Not me, that's for damn sure. Then again, I'm not fortunate enough to work for an on-line, live

nude chat salon on the Internet.

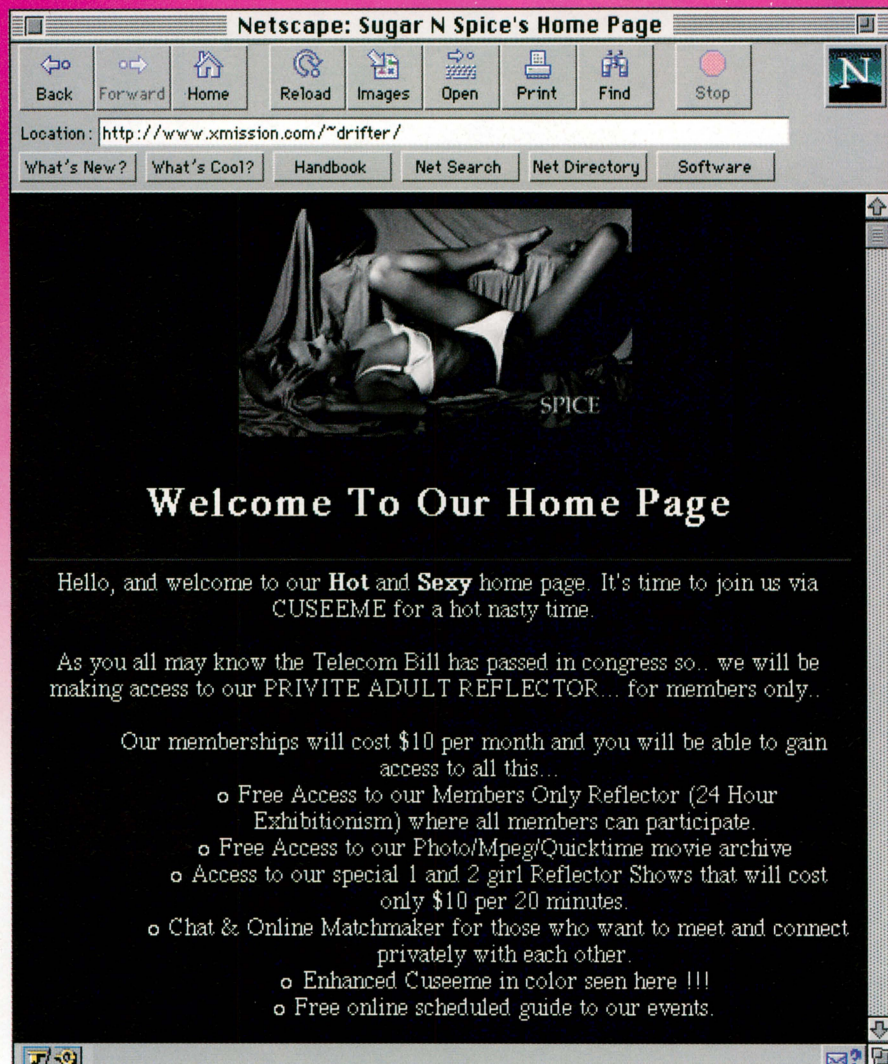

Megan, a gorgeous blonde, used to dance for a living. "It was exhausting sharing my body with thirty or forty guys (she smiles) now I share my body with only one person at a time."

Not only does working as a "Live Nude Chatter" seem like fun, it sounds fairly informative, too. Lucky for me, Megan comes over after work sometimes and shares the latest hot tip with me over a glass of Cabernet.

She prefers the shy guys. They take time to work into a frenzy. Every once in

"Colette" lives in Los Angeles where she spends her time drinking Cabernet with her girlfriends, observing the erotic underground and exploring her own sexual fantasies.

a while, she gets a day full of extroverts. "I had so many men talk about sexual positions today, especially the doggy style. I'm absolutely exhausted," she

lamented the other night. Receiving no sympathy, she added, "You try masturbating for eight hours. It gets tiring." Still no sympathy. Wasn't she describing

a version of heaven?

Every once in a while a strange story passes across the table. Megan's co-worker, Sterling, recently had a caller who professed to be a hypnotist who could make her do anything he wanted. (A man obviously not aware of the

"Sometimes it gets to be really hot." Says Brandy. "It makes me feel like the most beautiful and smart woman and there is NOTHING that makes a girl feel sexier than that"

present Internet limitations.) He then had Sterling stand up and dance like a robot. Now if I was a hypnotist, that's not a choice I would make, but Sterling actually feels that her social skills have improved as of late. We can only hope it came from more interesting activities than the robot dance.

Brandy, an exotic brunette, never seems to get the freaks. She gets wealthy men calling her from London, Singapore, and Tokyo. Together they get off on discussing sushi recipes, the latest in kundalini and other exotic topics. An avid

masturbating
for eight
hours," says
Megan. "It
gets tiring."**

neath her and smiles. "Basically it makes me feel like the most beautiful and smart woman and there is nothing that makes a girl feel sexier than that."

At the ripe age of seventeen, my pal Sheila knew a thing or two. It doesn't take a hot body to have great sex, just a hot mind. **IQ**

Will Adult CD's Keep

Can viewing erotica help keep marriages together?

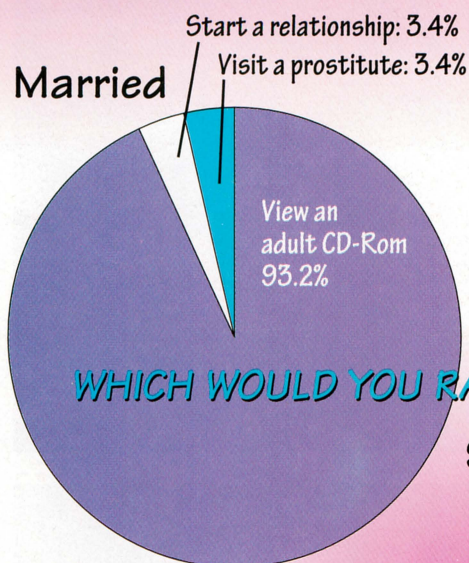

Nearly 40 percent of married respondents watch erotic CD-Roms with their lover.

Only two percent participate in erotic teleconferencing. Is this really the growth industry of the 90's?

The family that watches erotica together stays together. Sound unlikely? Well consider this: When asked whether they would rather visit a prostitute, start a relationship or watch an adult CD-Rom,

for those of you who have yet to visit) we didn't get a representative sample of humanity. We did, however, get a pretty broad cross-section of adult CD-Rom fans. Truth be told, that's what we were gunning for. We wanted to find out just how the *IQ* audience felt about adult CD's, and relationships.

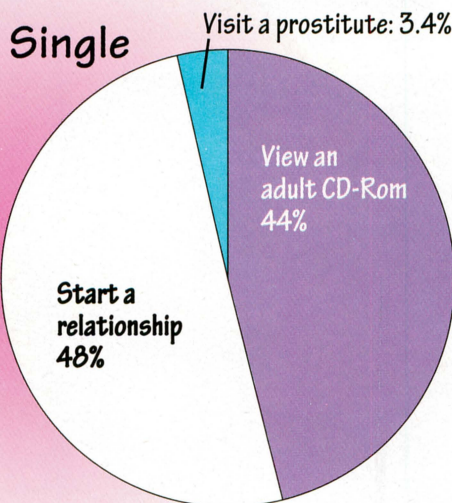

You'll be shocked to discover that the people responding to our survey were overwhelmingly male (98 percent). Well over half of the respondents were in their 20's, and all but around a tenth of them between the ages of 20 and 40. No real

well over 90 percent of the married people who responded to a survey we posted on our website and 80 percent of the ones in a relationship said they'd pick the CD-Rom. Another surprise in these days when nearly half of all marriages end in divorce, less than 5 percent of the people who responded were divorced.

Could this mean that viewing erotica actually helps keep marriages together? Is it possible that the presence of virtual women in the house keeps couples safe from real other women out of the house? Or perhaps they add just enough sexual spice to life that the temptation isn't there. Wouldn't that be a blow to those conservatives that would censor the Internet?

Okay, we admit it. By placing the survey on the *IQ* Web Page (www.iqmag.com),

surprise there. Most surveys show that this is the age group most apt to be using computers for entertainment.

A bit over half of the people responding to the survey either were single or divorced, a bit over a quarter of them were married and just less than 20 percent characterized themselves as being in a "serious relationship." What does that tell us? Well, for one thing, it shatters the

myth of the erotica fan as "the lonely guy." Our split between the attached and the unattached respondents was very nearly even (3.1 percent less hitched guys).

I Like to Watch

While we may have put the myth of the "Lonely Guy" to rest, using adult multimedia products largely remains a solitary pursuit. Two thirds of the people who responded to our survey watched alone. About a quarter, however, viewed them with their lovers, and under 10 percent watch with friends. Astonishingly, two percent of our respondents had never viewed erotica (kinda wonder how they got here in the first place).

These figures take interesting turns when broken down among married, single, "serious relationships" and divorcees. The divorcees that responded to the survey all watch alone, where just over half of the married folk said that they do their cyberotica solo. Nearly 40 percent of the married respondents watched with their lover, further evidence for our theory about adult multimedia keeping families together.

One of the more interesting findings was that of the folks in a relationship, the number who watched alone was equal to the number who watched with their lovers. These respondents also shared the experience with friends at a rate nearly twice that of any other group.

What I Like to Watch

As America's Premier Magazine On Adult CD-Roms we couldn't help feeling a tad dispirited that only a little more than half have used their computer to view an adult CD-Rom. So what sort of erotica do our respondents use on their computers? Over 80 percent view erotic pictures. And where do they get these erotic pictures if not from CD-Rom? Well, since the survey took place on the web, not surprisingly nearly three quarters view erotic materials on the internet. However, less than one quarter said they

Us Together?

BY HANK BORDOWITZ

participated in erotic chat rooms.

One highly revealing figure found that only two percent had participated in erotic teleconferencing. Is this really the growth industry of the 90's? With a figure like that, it's up or out. We'll keep you posted.

Two thirds had at least seen an adult multimedia CD-Rom. A bit over 40 percent had seen either movies or picture

I HAVE USED MY COMPUTER TO...

Play erotic movies 40.8%

Participate in erotic chat rooms 22.4%

Participate in erotic video teleconferencing 2%

None of the above 9.2%

discs. Of those with a preference, around 80 percent favored the interactive discs, a little over ten percent fancied movies and a bit under 10 percent enjoyed picture discs most of all. However, nearly half of the people surveyed had no preference. Do they like it all?

Let's Go Shopping

Getting adult interactive CD-Roms may be getting easier, but it still can prove problematic. Better than half the people surveyed purchased their discs via a mail order catalog. Around a quarter of the respondents bought their cyberotica from ads in computer magazines. About a third got them over the internet. Many acquired them in a couple of these ways (hence the figure over 100%).

Testimony to the growing appeal of these discs, for every disc the people who responded to the survey bought over the internet, they bought one at a retail store. Add in the retail computer fairs to this, and that means people actually went out for around 40 percent of the discs they purchased.

And what made them buy? Well, if we found the 50 percent buying discs disheartening, we were pleased that people responding to our survey purchased over 40 percent of discs based on positive reviews. About a third bought the discs they bought because they found the woman on the cover attractive. About a quarter bought based on either low price or the fact that they recognized

one of the stars featured on the disc.

This also offered a little insight into which was the more important part of the phrase adult interactive. A bit more than 10 percent bought either because the disc had the word "oral," "anal" or "butt" on the cover. However, slightly more

people said that they bought because it had the words virtual or interactive in the title.

Better than two thirds of the people surveyed owned less than four adult CD-Roms, with 90 percent of the respondents owning ten or less. Just over 6 percent admitted to having a serious collection of 20 or more adult CD-Roms.

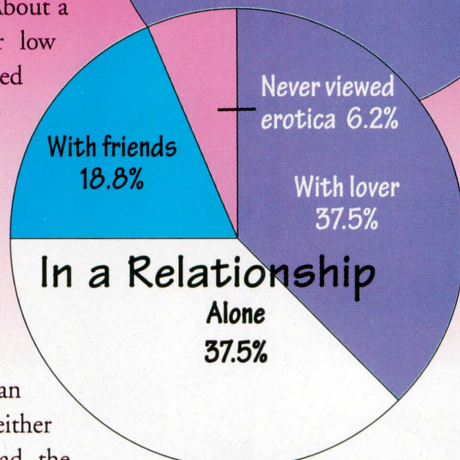

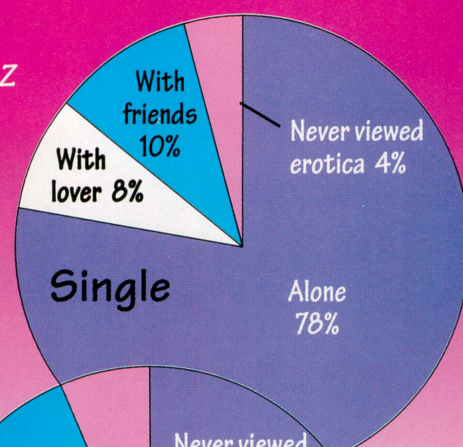

The Web of Erotica

This survey took place on the Web, so it did not surprise us to find that nearly two thirds of the people who responded spend over ten hours a week surfing the net. This included better than 15 percent who spent over 20 hours a week on-line.

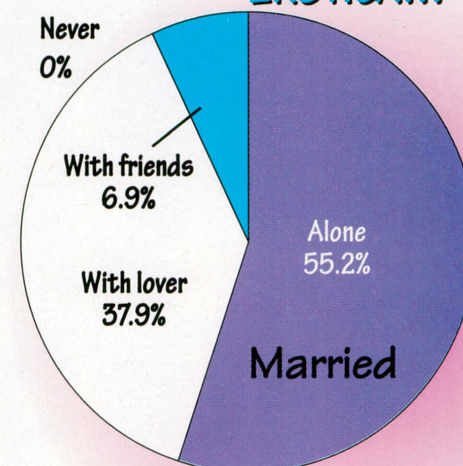

Less than 10 percent did their surfing and viewing on a Mac, while over 80 percent used some form of Windows.

So, What Does it all Mean?

If you spend enough time surfing the IQ website to answer the survey, chances are you enjoy adult erotica. The number of people who share their interactive erot-

I GENERALLY VIEW EROTICA...

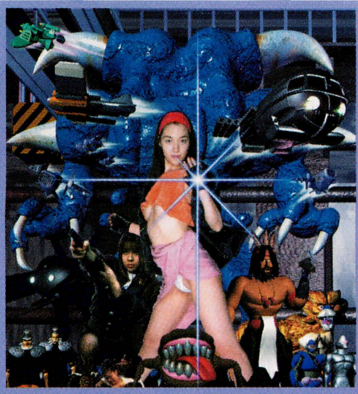

ic experience, however, was a pleasing surprise.

Which brings us to the main question — Are real women obsolete? Well, more of the single folks who answered us would rather either start a relationship or visit a prostitute than watch an adult CD-Rom. If that's not indication enough, just ask those couples what they do after they enjoy some cyberotica together. I don't think it takes a computer to figure that one out. In either case, women don't seem to have much to worry about. **IQ**

Talk about a change of heart. The heart of Spice Interactive has moved from the posh, manicured environs of Century City, Los Angeles to the bustling metropolis of New York. The high energy of the city lights seems to fit this cutting edge company better. It certainly has served its parent company, The Spice Channel well. Moving in with the folks in downtown Manhattan, the computer branch of the company has been settling in and tapping into the energy of both the pay-per-view

on the Spice Channel. They work even better on home computers.

By their own admission the guys at Spice strive to fill the gap between T&A and hard-core. It's a gray area of mood music and soft-focus photography where questions about what is erotic and what is pornographic really come into play.

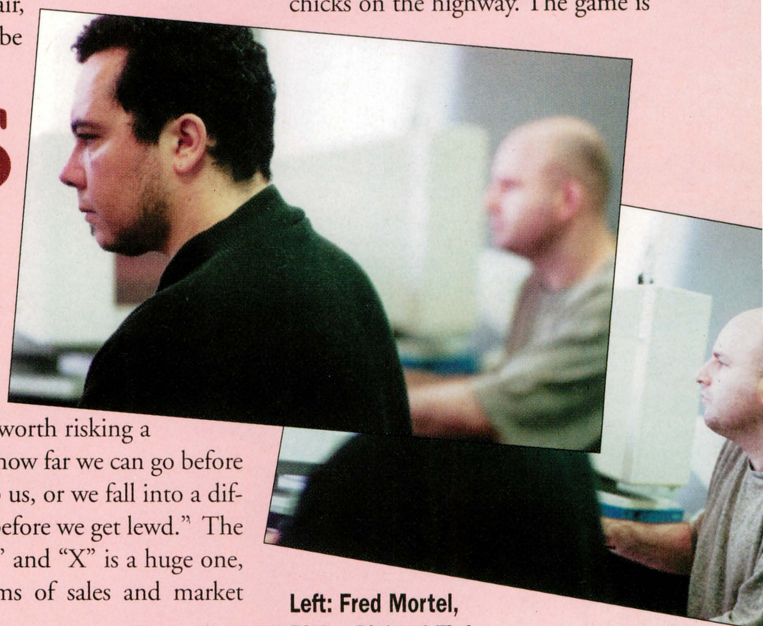

Fiefer sees this as a challenge. "Anybody can go out there and do hard-core, show everything, get the close-ups and go home. Or conversely, show nothing, no pubic hair, no nipples and be

you to solve puzzles, find secret passages and uncover the ghostly forms of beautiful women residing within. IQ critic Vince Warren called it "a complex game that should hold your interest. The mix of erotic scenes with game play is delightful — they got it right this time. A classy CD-Rom you will want to keep and play often."

Next on the Spice Interactive agenda is *Route 69*, a biker-babe extravaganza. Hitch a ride with some of the wildest chicks on the highway. The game is

Spice Takes Manhattan

erotic entertainment network and the city.

The entire production end of Spice gave up a second story office in sunny LA for this corporate consolidation. They had been there since Spice came into being. Richard Feifer, Vice President of Development at both Spice Interactive and CyberSpice, the on-line half of the popular "R"-rated entertainment producer, finds reason to rejoice and be somewhat saddened. On the one hand, he seems to enjoy New York's promise and the electric atmosphere. On the other hand, they made the move just before three foot blizzards crippled the whole area. You just don't get weather like that in Southern California.

No matter, though. Feifer and some of the major players at Spice Interactive packed up, backed up and shipped out. Slowly, they are getting back on line.

Spice was one of the first companies to release "R" rated movies on CD-Rom. They have remained a serious player in the adult CD-Rom field ever since, keeping up with trends like photo CDs, digizines, and interactive CD-Roms. They even managed to come up with their own hybrid brand of interactivity they dubbed "Interactive Fantasies." These collections of intimate erotic music video-like montages do very well

safe. I think it's worth risking a little to find out how far we can go before the censors jump us, or we fall into a different category, before we get lewd." The step between "R" and "X" is a huge one, but only in terms of sales and market accessibility.

But Feifer's primarily interested in getting the technological side of things right. "We're pushing the envelope. We don't go into work in the morning thinking 'How can we get another CD-Rom out of the same old stuff?' We're always trying to do something different. It's a full-time job just trying to keep up with what's out there."

Spice does all their programming in-house, under Feifer's personal care. Fred

already "in the can" — the final touches being applied and the marketing people getting the stuff organized to get it to the consumers. Things have slowed down because of the move, and at press time it had not yet been released.

Spice is a mixed bag of ideas and products, but that's the way they like it. "We want to be flexible in what we pursue," Feifer points out. "That way we're not

"I think it's worth risking a little to find out how far we can go before the censors jump us." -Feifer

Moritel works on one of the three Silicon Graphics workstations Spice has, along with a multitude of Apple Macintoshes that litter the office.

"We're still unpacking so it's all a mess," Fred confided when we talked in the Spring, "but usually the place is pretty organized. Not that it's never been messy," he laughs.

Last Christmas, they released *Ghostly Desires*, an interactive game that asked

feeling as if we're locked into something. We don't want to work from a formula or have the mentality that says 'we have to have enough this or that.' It's a more creative atmosphere. The move was one headache after another, though. I think I backed up about a tetra-byte of information. I felt like if I had to reload one more hard drive I'd shit."

Not that anyone would notice in New York. **IQ**

GET Help

BY ED TSUNODA

The Whole Internet Catalog

You can find the software that will make your cyber-sexing experience everything you dreamed of free.

If you work on your own car, or make “home improvements” by yourself, you know that having the right tool often saves a great deal of time and effort. The same holds true for getting the most out of your computer system.

Best of all, you can find much of the software that will make your cyber-sexing experience everything you dreamed of for free, right this minute. All you need is a modem and an Internet service provider. Here are some of the best additions you can make to your hard drive without spending a lot of (or often times, any) cash.

CUSeeMe — Video

Teleconferencing software

(www.wpine.com)

FREE

CUSeeMe allows you to connect by modem to other single users or reflector sites — a virtual meeting place for teleconferencing. Even if you don't have a camera, you can see other users or public ‘broadcasts’ by discovering the “IP address” of adult reflectors. There are many public and private strip shows available on a nightly basis. You can let everyone see you too by acquiring a QuickCam (\$85, Connectix 1-800-950-5880) which will plug into your keyboard and printer port. Both of these items install easily.

mIRC - Internet Chat Room Software

(www.mirc.co.uk)

FREE

People on larger Internet providers already have chat rooms available. IRC sites offer a wider group of people and have a lot of extra features when you use it with mIRC. You can fserve (a file transfer service) adult pictures and movies, construct a notify list of other users and send or receive files.

PKZip Windows (www.pkware.com)/Stuffit

Lite MAC (www.aladdinsys.com)

Compression Software

FREE

Both of these utilities will reduce the amount of space a file takes up on your hard drive. They will

also allow for faster file transfers and let you put much bigger files on floppies. Easy to install, you will find these tools very useful, since just about everything you download is likely to be in one of these two formats.

Netscape Navigator 2.02 and Power Pack 2.0 — Web

Browser and tools.

(home.netscape.com)

FREE

If you are looking for the ultimate in web browsers, This is it, hands down. Video, Shock-wave animation, 3D and real-time audio, all in one complete

internet package based on Netscape's web browser software. But the fun doesn't stop there. Also download Power-Pack 2.0 and you add some incredible tools. Netscape Chat allows you to access more of the real-time chat rooms, without the inevitable time delays one finds with most web chat sites. CyberSpell provides spell checking for your e-mail that recognizes emoticons — :) — and you also get a Norton Anti-Virus utility that checks out files before you download them. All in all it is a package that the serious surfer must acquire.

For more great free stuff, check out www.shareware.com. This excellent source provides nearly any tool you might need in your quest to perfect your system. Having tools made for the job makes everything easier. Don't set about tweaking your system until you've found the right tools. **IQ**

Quick Cam*

A Ghost of a Chance

By Vince Warren

Ghostly Desires invites you to explore a haunted 17th century brothel. While there, you solve puzzles, discover secret passages, and interact with the sexiest "ghosts" you have ever seen. *Myst* fans will relish the erotic twist *Ghostly Desires* has put on virtual navigation. The high quality, artful 3-D graphics and 30 erotic movies provide the sexual dimension you wish *Seventh Guest* had.

Using the full function control panel, you wander the old mansion seeking solutions that will set free the ghosts of seven sensual ladies of the evening. As each awakens, they reward you with a movie of their modern-day erotic apparitions. "Haunting" barely describes these sexy

bathtub romps, phone-lover fantasies, and truly eerie, erotic encounters in *Myst*-ical scenarios.

The complex game play should hold your interest. A reference hint book (look in the library, guys) helps when things get hard. The mix of erotic scenes with game play is delightful — they got it right this time. Although the erotic interaction is only marginal, expect to enjoy getting

into the *spirit* of the game.

The tech stuff is first rate: The game requires a 486 and 8mb of memory. You may have to tweak older systems' video drivers. The game ran all our tests without glitches, including clean, simple loading. The save/load feature is welcome here, (in case you want to return to the naked ghost in the cave). We give Spice Interactive points, too, for not cluttering the beginning of the game with time-consuming introductions!

This is a classy CD-Rom you will want to keep and play often. **IQ**

Picked Up, Turned On, Knocked Out

By JP Partland

Let me tell you about my night with Dawn. It started at a swank bar in a posh San Francisco hotel where she was staying. While I felt a little underdressed in such a flashy place, Dawn made me feel at home with some photos of her visit to the city by the bay. She was an upstanding citizen and would not accept just any come-on. She told more than one potential suitor to 'piss off.' In fact, she came damn near telling me to do the same.

I could tell that she was the kind of woman who needed a little romance in

her life, just as she thought I needed a lesson in etiquette. I can accept a little behavior modification from a woman who,

enchanted night with Dawn. For one thing, this guy's arm kept appearing where mine should have been. Also, when she

"When she expressed an interest in dancing, I suggested she start without me. She smiled as if I had unlocked her pleasure chest. She danced, and was ready to offer a good bit more."

besides looking so fine, seemed to know what she wanted out of life, or at least that night. We proceeded slowly. As we drank and talked, I was feeling oh-so-comfortable watching her enjoy herself. When she expressed an interest in dancing, I suggested she start without me. She smiled as if I had unlocked her pleasure chest. She danced, and was ready to offer a good bit more. All one could want without actual-ly being in the room.

Then I got a choice. I could go for it all or reach for the highlights. Of course, I did both. There were few flaws to my

wore lingerie (red, white, and black) she did not seem too inclined to move (something about photo files). When we did it all, there were pauses between segments. All in all, though, Dawn was innocent fun for a guy who likes dealing with women who have ideas of their own. **IQ**

X-rated game. Join the fight for freedom against The Coalition, but beware—the cyberspace security force wants you.

that supplies plenty of lurid voyeurism for the hyper-libidinous, while offering a real challenge for the gaming enthusiast. Don't worry — the manufacturer has thoughtfully added a separate file filled with all the necessary cheat codes, for those of us who fall into the former category.

Although the graphic environment is

group stands poised to gain the majority in an upcoming election.

It may sound like the lead story for a not-too-distant future edition of *60 Minutes*. The

premise is really the cornerstone of an excellent new game

Deep Throat Goes To Washington

By Paul J. Grant

In these repressed times, when Beavis & Butthead can become causes celebre for civil libertarians, it's hard to picture a time when X-rated movies were actually chic. Once, the hottest ticket in town and the hippest date movie of them all was a film about a woman whose clitoris was located in the back of her throat. But that was the situation in 1972, when Gerard Damiano's *Deep Throat* was on everybody's lips ... so to speak.

By 1986, however, when this putative sequel was made, things had changed quite a bit. Ed Meese was Attorney General, the religious right was becoming a force to be reckoned with, and the concept that pornography was demeaning to women was gaining popularity. *Deep Throat II* meets these nemeses head on, but in its quest for political empowerment, it comes off rather preachy.

The plot (and this movie does have a plot) is that Laura Liplock (Krista Lane) is the wife of a senator (Jamie Gillis) who is in charge of a congressional committee investigating pornography. She is also the daughter of the woman on whose life the original *Deep Throat* was supposedly based. While watching that film, Laura is possessed by her mother's spirit, and becomes much more sexually aggressive. She surprises her staid husband by willingly fellating him, invites

adequate, it's the clever concept, slick presentation and appropriately nasty video clips that make this one a stand-out. The installation and start up are hassle-free and the program itself exhibited none of the common bugs and glitches found in many other adult Roms. Most sexy interactives utilize stock coital footage culled from pre-existing feature libraries, but this one actually manages to incorporate the clips in a way that propels the story line.

some strange men to gang bang her, and seduces both a female shrink and a lady newscaster. The film has a lot of action, but also an extraordinary amount of talk, most of it very sincere stuff about personal freedom. It's hard not to applaud the sentiments, but just as hard to keep the pointer off the fast forward button.

Lane is quite believable as Laura, but Gillis — usually one of the wittier male adult movie stars — is given precious little to work with. Ron Jeremy clowns around as a televangelist, and Sheena Horne is easy on the eyes. The film has high production values — a good score,

exterior location footage in

Washington, D.C., and

moody cine-

matography

which, unfortu-

nately, tends

towards murki-

ness when

reduced in size.

Still, the film has its moments, and its

message is just as contemporary today as

it was a decade ago. **IQ**

DEEP THROAT II

(Interactive Classics, Inc.)

Couples, full-nudity, penetration
The Language of Lust

"Watching Euro-knockout Angela Bella vince for the camera is definitely worth the price of admission."

Angela Bella.

Technically, *Anal Europe* was easy to master and fun to use. As the guest of honor, you get to navigate through a small European hotel's six rooms and lobby and peek into the rooms of other guests. Just getting to the rooms provides an entertaining interactive element. Fortunately, the programmers kept the environment to a comfortable minimum.

The QuickTime movies run with outstanding quality and clarity on a Mac Quadra 800 with a 2X CD-Rom drive. There's no full-screen option, but the bonus slide-show more than makes up for the video size. It seems that *Anal Europe* is the CD-Rom version of an existing VHS movie. Unfortunately, I was unable to find a copy in any of the

...Score!

three video stores in my area (although the research was fun!).

Despite the program's technical excellence, the lack of a "boss button" or an emergency-escape key is a dangerous omission. Also, the CD could have featured more performances. There was a bit of wasted "talk" space that should have been filled with, well, more sex. Watching Euro-knockout Angela Bella vince for the camera, though, is definitely worth the price of admission. Bella's heart-stopping beauty and willing sexual performance will keep you returning to Room 69, located in the quaint town of *Anal Europe*. **IQ**

It's All Fun and Games When Someone Loses Their Clothes

By Matthew Lee

Take the old card-matching game of Memory, place pictures of nude women under the cards, and you have an idea of how to play *Memory Strip*. The tasteful, sharp pictures of pretty girls make this one worth playing again and again. The game itself is fun and can be addictive.

The simple, easy-to-learn interface allows the player to choose from six girls. Each have at least nine different pictures. You get to see one picture per stage. The game gets a little harder and the photos become more revealing with each stage, from fully-clothed to totally nude. If you don't have the right cards to finish a level, you have to

draw more. This can really stretch out a game, but special cards appear eventually that will help.

The program is supposed to save your place so that you don't have to play the early levels again, but it seemed to re-set after I finished several of the girls and returned to it later. Perhaps an actual save file would work better.

This is an addictive erotic matching game that has the potential for a solid series, the second of which has already been announced. **IQ**

Hittin' Da Average With Orifice Workers

By Vince Warren

Ever seen gang chicks in L.A. swap stories by a graffiti-covered wall about "hittin' da skins" (translation: "getting it on")? In 13 satisfying (but familiar) sequences these sexy, primarily African-American, actors and actresses sizzle up the screen. The screen is pint-sized, but Anna Amore' and Rachel St. Clair are yummy on *any* screen! Remember when the video mar-

ket was suddenly inundated with tapes of everybody "doin' it" with everybody, regardless of race, creed, ethnicity or sexual orientation? *Hittin' Da Skins* announces that this time has come for

Enough hot stills to wallpaper your cyber boudoir. And rev up that ol' Windows Sound Recorder to steal these orgasmic squeals.

Boop to the Butts

By Jeff Lang

VCA Interactive based the game portion of *Anal Rom 2* on Simon, a popular electronic game/toy of the 1970s. The opening interface displays four different colored "buttons." Like Simon, the buttons boop in a random sequence that the player has to copy. Copy it successfully and the game rewards you with a 2 to 3 minute video clip. After the clip plays, the sequence plays again with one additional boop. If you write down the first five colors and keep track thereafter, the game gets pretty uninteresting. On

the other hand, if you really want a challenging memory game, go out and buy Simon.

Let's face it — you buy an adult CD-Rom for the sex videos. On *Anal Rom 2*, they range from okay to pretty hot. Each one has certain thematic elements in common (see the title), and a liberal

amount of KY jelly is spread around. The game seems to have copped twelve sequences from a few (obviously high quality) movies, as certain faces and ... uh, other things, pop up in more than one clip. Unfortunately, for anyone interested, they don't say which movies.

The uncomplicated Simon interface offers you the choice of a handful of sounds besides "boop," and can control the speed of the play.. The video playback interface presents problems, however. You can play the clips and pause the clips. You can even fast-forward and enlarge them. I did it, but how remains a mystery to me. Alas, they don't even offer any obvious instructions.

The package comes with the usually reliable QuickTime 2.0 software.

Some of the images roll and break up in a couple of spots. While that didn't really take away from the general quality of the clips, it all contributes to a general "tossed together" feeling. *Anal Rom 2* doesn't live up to VCA's usually high standards. **IQ**

ANAL ROM 2
(VCA Interactive)
Interactive Game
X-rated
Hybrid

★★★1/2

Full nudity, Couples, Penetration. Certain faces and... uh, other things, pop up in more than one clip.

CD-Rom. There's every combination, with plenty of black-on-white action, or should we say black on, in, and "around" white (and pink)!

It says "interactive," but the easy-to-use interface is little more than a button panel to run the videos, once you get through a twenty questions segment. Be a little cautious in loading the program to your PC, though, since the directions are not clear even when followed step-by-step. When will these guys learn to put the whole start-up on "D:"? Also, to run this one in a larger-than-postage-stamp mode (click down to half size, kids) requires a turbo-charged video card. The video transfer is below average anyway.

What is NOT average is the super supply of images for you file-rummagers. You get about 200 hot stills — enough to wallpaper your whole cyber boudoir. And if you need new .wav sounds for your Windows start-up, rev up that ol' Windows Sound Recorder to steal these orgasmic squeals, Jack. They're the ones.

It's about average. So what? You need at least one ordinary every-orifice salt n' pepper CD-Rom for your collection, don't you? **IQ**

Fresh-Faced Girls, Top Notch Poker

By Brad Marlowe

This one is a rarity — an adult interactive you won't be ashamed to bring home to Mom. Okay, maybe not Mom — but horny Aunt Edna will love it. *Strip Poker Professional II* doesn't just top all the adult gambling games, it beats out all the poker programs of any type that this reviewer has come across. You face off against one to three players of either sex, so wives and girlfriends can join in. The opponents all have different betting styles — this helps keep the game lively.

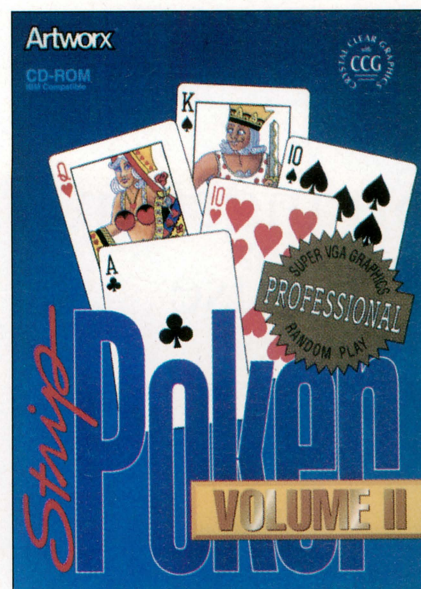

Installation is fairly simple, but you may need a little help getting the DOS version to run on newer machines that have Win 95 pre-installed, since Microsoft, in its infinite wisdom, has chosen to strip down DOS to a shadow of its former self. The good news is that if you do have a problem, of any type, the tech support team at Artworx is friendly, determined and accessible (via Internet or toll-free number). Artworx claims that with approximately 100,000 copies of *Strip* and *Strip II* on the market, they have yet to find a single customer that they couldn't get up and running. If you're familiar with adult software, or any other type of software for that matter, you'll understand that that's quite a feat.

Strip Poker Professional II features nudity of the R-rated variety in the form of hires stills that change along with the losers'

dwindling bank accounts. Each opponent has three wardrobes and sets of corresponding poses that cycle randomly at the beginning of each session. Some are demure and others a bit racier, though none are graphic enough

to make Aunt Edna run screaming from the room.

If there is a down side to the *Strip Poker Professional* series it would have to be the cost. After paying as much as \$55 for *Strip II*, additional teams, which you can buy directly from Artworx, will run about \$24 per, or \$90 for all five (the main disc includes one team of four players). But, as Aunt Edna says, you get what you pay for. *Strip Poker Professional II*, with its

superior poker game, fresh-faced girls next door, and proven track record is the strip poker game to buy. **IQ**

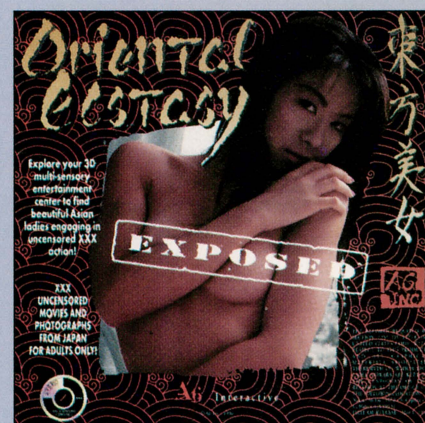

Asia in the Raw

By Jeffrey C. Morton

Imagine your own private viewing room where you can enjoy three hot slide shows and three sexy movies. *Oriental Ecstasy Exposed* takes you there, also offering a teaser for an upcoming disk from A6. The interface requires you to drag a slide tray to a projector or a video tape to a VCR. You then control what you see with an on-screen remote. The VCR remote lets you jump forward or backward in one minute intervals. You can even input the minute and second that you would like to jump to, a very handy accessory for people who like to skip to the heavy action.

The slide show photos are crisp and very arousing. The ones shot in a classroom offer an insight into why Asian students do so well in school. If American schools had this kind of activity, attendance would never be a problem.

The three movies are hot, though less imaginative than the stills. One of the actresses is absolutely gorgeous. The other two aren't bad, but aren't exactly eye-widening beauties either. The raw, underproduced quality of the sex itself is distracting at first, but it grows on you. For instance, in one movie the headboard of the bed bangs the wall when the

action really gets swinging. If you like amateur action, with both its flaws and its enthusiasm, these movies will get you worked up.

The one facet of this disk that needs some work is the level of pixelation when you zoom a movie to the full screen, at least on a 486/50 with 8 megabytes of RAM, a double speed CD

drive and video set to 640 x 480 x 16 million colors. However, this disk's charms more than make up for its flaws. As long as you don't double-click the icon expecting perfection, this disk will entertain you well. **IQ**

Stranger In Paradise

By Richard Neilsen

You can find a lot of things in an *Asian Paradise*. This CD offers three lovely Japanese women in a variety of exotic settings.

You get to pick the woman you'd like to see, and the setting you'd like to see her in. The disc pictures all three women in the same locations.

ASIAN PARADISE

(A6 Inc.)

Movie
R-rated
Hybrid

★★

*Cable Nudity
Two of Japan's Top
Erotic Actresses and a
TV Reporter
Bare All*

The women include playmate Ayako Ichikawa, television reporter Chihiro Matsumoto and adult movie star Ami Aikawa. You can choose from settings that include "room," "pool," "sea," or "image."

Using these backgrounds, the women disrobe, dance or otherwise put on a show comparable to what you'd get in most go-go venues. The "image" selection treats the viewer to the actress running around semi-clothed in her native environment (Although it's hard to tell whether that environment is Japan or Hawaii). Same goes for the sea setting, only here you see the actresses nude and semi-nude on the sand, in the water and near boats.

Plenty of muscles (above and below the belt).

When in Studland...

By Eric Mueller

I don't know if Titan is a town, an island, or just a studio, but I'd love to visit and see more of the men. *The Men of Titan*, a set of over 200 high-quality stills of muscular, hung men, features Titan's hottest models. Included in the collection are a built black guy, studs with mustaches, sexy men in tight briefs, several couples and one gorgeous redhead. Every photo is sharp and clear and the assortment of men will keep your interest.

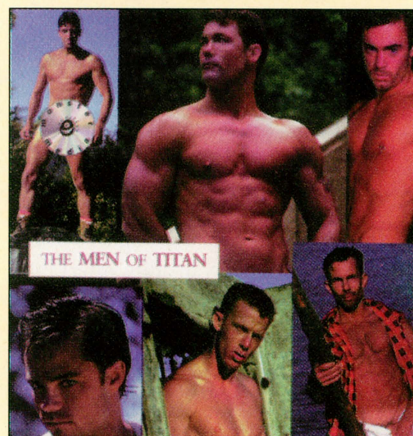

The disc suffers from two maddening organization problems. First, Titan gangs all the pictures together in one folder. They identify the shots only by number: 1.JPG, 2.JPG, and so forth. To further complicate things, they don't number the shots consecutively. Unless you know its number, count on having trouble finding the JPEG of that one stud you want to see.

They compound this problem by not offering a catalog of images, on the disc or in the CD's liner notes. In fairness, they do provide shareware viewers on the disc that can generate thumbnails, but

With your options limited to three women and four choices of locations, it boils down to just 12 film clips. While they're all well done, they use the same types of scenes for all three women, so *Asian Paradise* becomes a bit redundant. How many times can you see a Japanese woman rolling around in the surf in coastal Japan? Or by the pool?

Fans of Asian women will find what they're looking for — the picture quality and appropriately Japanese music tracks are good to excellent throughout. On a Pentium PC installed with Windows '95, the CD runs quite well.

My favorite is Ami Aikawa. But, unfortunately, she doesn't do very

the supplied Windows viewer took 15 minutes on a Pentium machine to create a catalog of images. Waiting that long to check out the hot guys on the disc seems like forever!

When you're dealing with a disc full of stills, small problems like these make a big difference. Hopefully, the next release of *The Men of Titan* will correct these oversights. In the

meantime, if you're looking for some high-quality humpy men and you don't mind digging around a bit, you'll find plenty of titanic muscle (above and below the belt) on *The Men of Titan*. **IQ**

Nothing Succeeds Like Excess

By Vince Warren

Leave it to Romsoft to lead the pack in, er... packs. This tasty variety of six erotic CD-Roms will probably please just by sheer excess of sex if nothing else. The mainstream CD-Rom market has long packaged groups of related-subject software — remember those twenty-disc packs at your local Computers R US? Now, a savvy adult erotic producer has figured out this marketing technique, too. The offerings here run the gamut from granny-approved, R-rated lingerie still shots (*Luscious Ladies In Lingerie*) to some really sizzling XXX video transfer scenes in *Ecstasy Suites*. Like all “collections”, the quality varies, and variety is not always the spice of life, ya know?

The production values vary as well, from the surprisingly pretty, vivid color of the lingerie disc to some unviewable semi-stop-motion video in the *Striptease* disc, a kind of long-winded infomercial for the Pure Platinum Clubs. (We'd change the name to “Pricktease,” actually.) The intellectual adult Rom historians among us will love charting the progression of Romsoft's digital sophistication from zero to ‘pretty good.’ At the same time, the horny among us can range through such

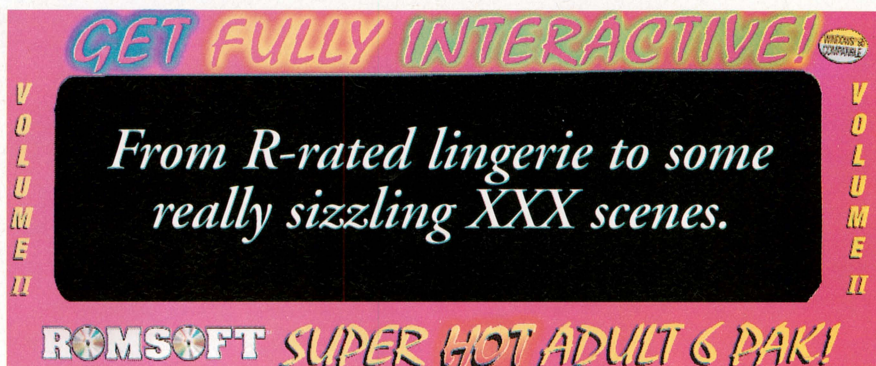

offerings as gyrating, teasing models *Hot Dog Girls of Florida*, to a Pink Panther-type inspector who manages to “probe” several delightfully nude suspects while maintaining the world's worst French accent in *A Shot in the Pink*.

★★★

*Disks vary from:
Chaste to Full Nudity,
Peekaboo to Penetration,
Women only to
Couples & Groups*

Faithful *IQ* readers know how picky we are about the term “interactive.” These discs use and abuse the word in many ways. Each disc has the phrase “Fully Interactive” printed somewhere. That can mean you get to click on the start button, or it can mean you control the way the cursor goes between scenes. However, by the time you get to *Babe Patrol* you have a simple, playable game with a bit of interactive involvement while the girls get naked. Then you get to *Ecstasy Suites*, a truly interactive game with that elusive payoff: videos at the end of each task that make the game worth playing. *Ecstasy Suites* has great humor, and a playable game you can get lost in (you search room to room in a sexy hotel). The disc offers lots of hot couples video action — including a

“backdoor” scene that will blow you away when you discover it. It ain't *Latex*, but what else is?

You'd think that CD-Rom producers would listen to *IQ* and put the whole startup-routine on the disc itself, but you have to install each one of the 6 discs, eating up a total of a couple of megs of hard drive. Thankfully, you end up with only one extra group in your Windows Program Manager, however; and the discs install easily. Any Windows 486 with a 2x CD will run the package.

If you just got your first CD-Rom PC, this is a must collection that will instantly stock your shelf with nearly the full range of adult erotic CDs. If you already own six degrees of interactivity, try *Latex*. **IQ**

The Naked Arcade

By Nicholas Andrews

Private, the Swedish publisher of adult videos and magazines, takes a shot at the gaming market with *Pornmania*. This double CD mixes sex with arcade action while sporting over 1,200 MB of hard-core movie clips for DOS and Windows.

The featured game, *Pornmania*, plays like an early version of *Super Mario Bros*? You maneuver your Pornmaniac, a baseball-capped character, through a series of obstacles. To make things interesting, deadly hookers chase your character. Careful, because they can turn you into a grease spot on the wall.

The main game leads you into a series of supporting games. Porntris (a

XXX rated version of *Tetris*, which could have been more creative by mapping people posing in sexual positions onto the falling blocks), Memory Match, and Maze, play like their more mundane

More Fun With Dick and Jane

By Jeff Lang

Dick and Jane are back and they still like to watch. In *Where in North America are Dick & Jane?*, a worthy successor to Avica's 1995 release *Where in the World*

American dollar is keeping them closer to home.

As in the first one, *Where in North America?* is a lot like the popular and

some knowledge of geography is useful. Dick & Jane's questions also depend on a slightly smutty sense of punmanship.

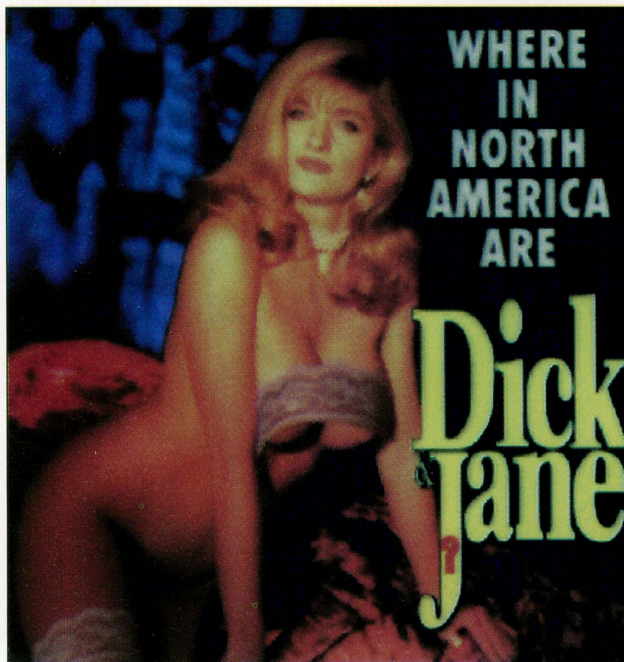

Correct answers earn "Dick & Jane" points and a hot scene. Incorrect answers get a raspberry. The player gets three stabs at each question, though each incorrect guess costs points. Accumulate enough points and the game rewards you with a special bonus clip. There are nine clips in all, a generous number for a single CD-Rom.

Where in North America are Dick & Jane? is a slick, handsome program with lavish graphics and a well-designed interface. The nine video clips are hot with generally attractive men and women and high quality production values. The sex scenes do not add anything

new to the annals of erotica, but that's hardly a complaint you can lay only on Dick & Jane's doorstep. It's unclear whether these scenes were produced especially for the CD-Rom, though many of them have Dick & Jane chatting with the actors and actresses before things get too heavy—a fun touch.

Each clip comes with a companion stills library. The Video for Windows 1.1 package included on the CD provides superior video resolution, volume control and superior control. Avica recommends a minimum of a 386 a 640x480x65K display setting for your monitor, which is necessary. All in all, Dick and Jane are a class act. Catch 'em if you can. **IQ**

"...a slick, handsome program with lavish graphics and a well-designed interface."

are Dick & Jane?, our daring couple are again on the prowl for sexual thrills. This time, though, it seems the weak

seemingly countless *Carmen Sandiego* quiz games. The object of all these games is to answer a question where

Mixes sex with arcade action. Sports over 1,200 Mb of hard-core movie clips.

arcade game inspirations. Complete these games, and the program rewards you with a picture or a 10-15 second video loop.

The Windows disc holds a wide variety of hard-core sex scenes. The video on this disc is at least two years old and has its limitations. Users can view several screens full of thumbnails from the individual sex scenes. When you click on a thumbnail the screen clears and the video clip rolls. A zoom button enlarges the video to the desired screen-size for playback.

However, when played with the keyboard, *Pornmania* was awkward to use. The DOS CD would not start up on a machine with Windows 95. The CD

would only work with a system running Windows 3.1 and booted directly from DOS. We tested the game on four machines with the same results.

If you are looking for the best part of adult videos — the sex scenes — mixed with very basic graphic arcade games, look no further. For fans of Private's magazines and movie series, this is just another way to watch the material again. **IQ**

CAUGHT IN *The Web*

BY SCOTT WOLF

The New Bull Market

Come, as I escort you, Rod Serling-like, through the delightfully twisted *Twilight Zone* of the wild, wacky, World Wide Web. I ought to warn you up front, though, that my attitude toward NetSex is not what you'd expect. Like everything else on the Internet, finding and participating in sexually oriented areas is a slow and tedious process. I often find it a monumental waste of time. But hey — you're the boss, I'm just the driver. Hop in and buckle up (or strap on) anything that makes you feel comfortable.

Regular readers have already had a few opinions on on-line cybersexual experiences. The basics of getting connected and finding something to do, including Internet Relay Chat (IRC). Have been called "very addictive".

Wrong! What's the point of having a conversation with someone whose every word is more than likely bull? You must know that most of the people you encounter on-line are lying about their gender (and lord knows what else). The safety of anonymity is the big attraction here. Anyone can go on-line as a studly Chippendale dancer or, just as easily, an 18-year old Samoan lesbian and no one would be the wiser. If Roseanne pretending to be Janine gets you off, more power to ya.

Then there are the Usenet groups, where you can find erotic fantasies dealing with anything and everything you can imagine. If you want to talk about your sexual obsession with marsupials or want ten thousand blurry pictures of Christina Applegate's left breast, captured and scanned from her loser film *Streets*, then this is the place for you.

In a Websurfing session no one mentions the tiresome wait for graphics to load (and the inevitable

404 Errors saying that the URL you requested couldn't be found). But then you get introduced to 'Hypertext Links' (the Web's true addictive ingredient) and the Yahoo search engine. So far so good.

One important thing to remember when using Yahoo (or any other search engine) is to be specific. Use the engine's Enhanced Search feature, if there is one, to narrow the field. Otherwise you may find yourself wading through dozens of unrelated subjects.

Say you're trolling for pictures of Jennifer Connelly (sorry, but Pam Anderson was too damned obvious — they're practically throwing her at us). If you just enter "Jennifer Connelly" in the field you may also find a bunch of Jennifer Aniston sites (which isn't such a bad thing, really). You'll also get sites about "Pathologia Paidon," a simplified reference on lung cancer, breast cancer, and the PAP Test by Pat Connelly (probably not as stimulating). Try telling the search engine to retrieve only instances of Jennifer AND Connelly together.

By the way, if you're looking for on-line shrines to female stars, you really ought to start at <http://www.awpi.com/Combs/babes.html> for Celebrity Babes on the Internet.

Meanwhile, if you haven't played 3D Realms' *Duke Nukem 3D* yet, get your ass over to <http://www.3drealms.com> and snag the shareware demo. The weenies have already taken offense at the occasional female nudity in the game (but not about the blood and violence, of course). This certified *Doom*-killer deals with invading aliens and their evil intentions toward Earth's women. As Duke says, "Nobody steals our chicks...and lives!" **IQ**

ANYONE CAN GO ON-LINE
PRETENDING TO BE A
STUDLY CHIPPENDALE
DANCER OR, JUST AS EASILY,
AN 18-YEAR OLD SAMOAN
LESBIAN, AND NO ONE
WOULD BE THE WISER.

Ai Mizuno, one of the amazing actresses in *Asia X* has talent to spare. This prolific performer has starred in over 40 Japanese erotic films.

Aika Miura, a siren from *Asia X*, just broke into oriental erotica. We expect great things from this talented temptress.

Made in Japan

Home of your TV, your VCR, your computer and these incredibly foxy women!

A6, the California-based studio that specializes in producing and importing CD-Roms featuring Asian ladies, has had a number of best sellers lately. Their discs range from interactives like *Tokyo Nightlife*, *Japan XXX* and *Samurai Pervert* to movie discs like *Asian Paradise* and *Superstars of Japanese Porn* (Nos. 1 and 2). They also have some very nice photo collections (*Tokyo Glamour Girls* and *Asia X* come to mind), and recently started carrying Japanese anime – the hot, hot, hot cartoon adventures like *La Blue Girl*, *Adventure Kid* and the *Urotsukidoji* series.

Their newest title, a two disc space adventure game called *2069 Oriental Sex Odyssey*, is rockin' the free world. The scenario is a post-nuclear blasted world in which you battle mutant bandits with the help of a beautiful Sex Ranger.

Judging from this great collection, the East is the best. Sorry, Jim.

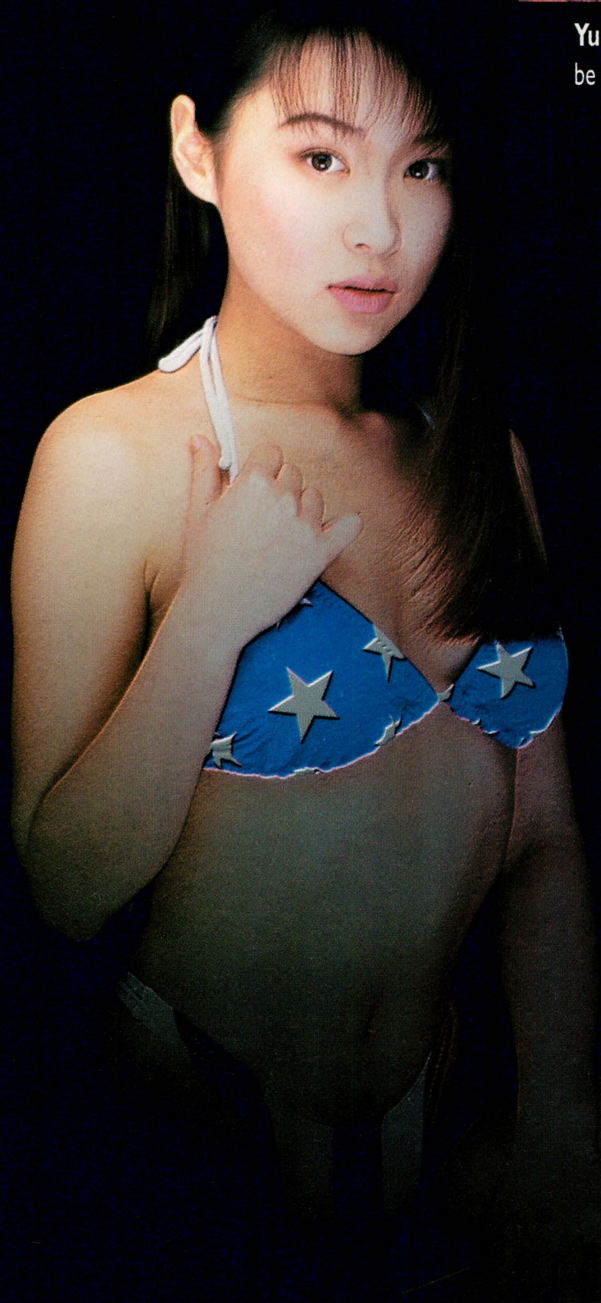

Minami Takakura, displays what makes her one of the *Superstars of Japanese Erotica*, her A6 title.

Yu Sasaki has what it takes to be a *Tokyo Glamour Girl*.

Star of *Superstars of Japanese Erotica #2*, **Momoko Kirishima** has performed in many Japanese adult films.

Yummy Asia X star **Yumi Asano** loves the United States and really wants to visit. We're waiting!

Toys for Your System

By Brad Marlowe

No one in the office will be able to keep their hands off: The Booby Trak

There are lots of ways to avoid working while chained to the computer. You could optimize your hard drive for the third time this week. Maybe check that e-mail for the fifth time today (you never know, Ed MacMahon may start notifying winners via the Net and since you FedExed your entry — it's only a matter of time). Or you could stiffen your hard drive a bit with one of these sexy system enhancements.

Sounds like sex: Beep Throat

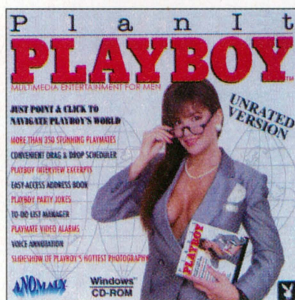

For monitor conservation that's hands-down the pick of the adult litter, try the *Playboy Multimedia Screen Saver*. You can choose from several preset presentations or create your own multimedia half-time show by compiling any or all of three hundred bunny pix and ten separate

QuickTime movies. And for a real time-sucker — choose one of fifty different transitional effects for each image in your erotic masterpiece. If that sounds a little excessive, try *Stripper Savers*, a full-motion collection of five Floridians who will inhabit your blanked screen, just looking for an excuse to disrobe. You'll probably recognize these girls as the opponents from *Poker Party*, but don't worry — this time they've got absolutely nothing up their sleeves.

On the just plain goofy side there's *The Booby Trak*, a breast-shaped pointing device whose rollerball is — you guessed it — a nipple. The construction is flimsy and the unit's practicality for daily use is questionable, but as a gag gift for your favorite computer junkie this one's unrivaled.

If you'd like something a bit more practical, but still a little frivolous, you'll love *PlanIt Playboy*. This full-featured software package on CD Rom offers a daily plan-

ner, address book, reminder program, and sexy entertainment center all rolled into one. In addition to the daily bunny (which you can double-click to get a full screen image), you can check out the joke of the day or browse through some of

Mix business with pleasure: Plan-It Playboy

Playboy's famous interviews. Best of all, you can devote hours to customizing everything in the package and say it was all in the name of organization.

Finally, there's *Beep Throat*. This unique collection offers a selection of erotic .wav, .snd, and .aiff sounds to assign to your

PC or Mac event cues. While not graphically sexual, the vocalizations, performed by four porn divas, add an erotic charge to even the most mundane computing task. Try "Mmmm...stick it in" when you load a floppy, or "Oooohh — that hurts sooo good" when you save a file. At the very least you'll have the neighbors convinced that you're having way too much fun.
